

ANH1510 - Veterinary Medical Terminology

School

School of Life Science & Business

Calendar Description

Students will be expected to use veterinary medical terminology as a part of the animal care team in industry. In this course, students will differentiate and apply components of animal health system terminology for small, large and companion exotic species.

General Areas of Competency

1. Apply medical terminology components to animal health systems.
2. Analyze the components of medical words that relate to the musculoskeletal system.
3. Analyze the components of medical words that relate to the gastrointestinal system.
4. Analyze the components of medical words that relate to the urogenital system.
5. Analyze the components of medical words that relate to the cardiovascular and respiratory systems.
6. Analyze the components of medical words that relate to the integumentary and endocrine system.
7. Analyze the components of medical words that relate to the nervous, sensory and immune systems.
8. Identify terminology associated with the basic health systems of companion animal exotics.

Competency Statements

- A. Apply medical terminology components to animal health systems.
 1. Apply general rules to medical word building and analysis.
 2. Use terms relating to body planes, positions, directions and cavities.
 3. Use common anatomical terms.
 4. Use common species terminology.
- B. Analyze the components of medical words that relate to the musculoskeletal system.
 1. Differentiate the components of medical words that relate to the musculoskeletal system.
 2. Identify the components of the musculoskeletal system in small animals.
 3. Identify the components of the musculoskeletal system in large animals.
- C. Analyze the components of medical words that relate to the gastrointestinal system.
 1. Differentiate the components of medical words that relate to the gastrointestinal system.
 2. Identify the components of the gastrointestinal system in small animals.
 3. Identify the components of the gastrointestinal system in large animals.
- D. Analyze the components of medical words that relate to the urogenital system.
 1. Differentiate the components of medical words that relate to the urogenital system.
 2. Identify the components of the urogenital system of small animals.

3. Identify the components of the urogenital system of large animals.
- E. Analyze the components of medical words that relate to the cardiovascular and respiratory systems.
 1. Differentiate the components of medical words that relate to the cardiovascular system.
 2. Identify the components of the cardiovascular system of small and large animals.
 3. Differentiate the components of medical words that relate to the respiratory system.
 4. Identify the components of the respiratory system of small and large animals.
- F. Analyze the components of medical words that relate to the integumentary and endocrine system.
 1. Differentiate the components of medical words that relate to the integumentary system.
 2. Identify the components of the integumentary system in small and large animals.
 3. Differentiate the components of medical words that relate to the endocrine system.
 4. Identify the components of the endocrine system in small and large animals.
- G. Analyze the components of medical words that relate to the nervous, sensory and immune systems.
 1. Differentiate the components of medical words that relate to the nervous, sensory and immune systems.
 2. Identify the components of the nervous system in small and large animals.
 3. Identify the components of the sensory system in small and large animals.
 4. Identify the components of the immune system in small and large animals.
- H. Identify terminology associated with the basic health systems of companion animal exotics.
 1. Identify terminology associated with birds.
 2. Identify terminology associated with rodents.
 3. Identify terminology associated with reptiles.
 4. Identify terminology associated with small mammals.

Evaluation

Evaluation Method		Mark Distribution (%)
Assignment(s)		30
Quiz(zes)		30

Conditions Related to Evaluation

Late assignments, and/or projects, missed quizzes, tests, and/or final exam will be graded '0' unless prior arrangements have been made with the instructor.

Textbooks

Requirement	Author	Title	Edition	Publisher	Year	ISBN
Required	Romich, Janet A	An Illustrated Guide to Veterinary Medical Terminology	4th Edition.	Delmar Cengage Learning.	2015
