GLOSSARY OF TERMS	132

EXECUTIVE SUMMARY

This Three-Year School Capital Plan 2014-2017 is an analysis of the CBE's forecasted school capital needs, as assessed at the present time.

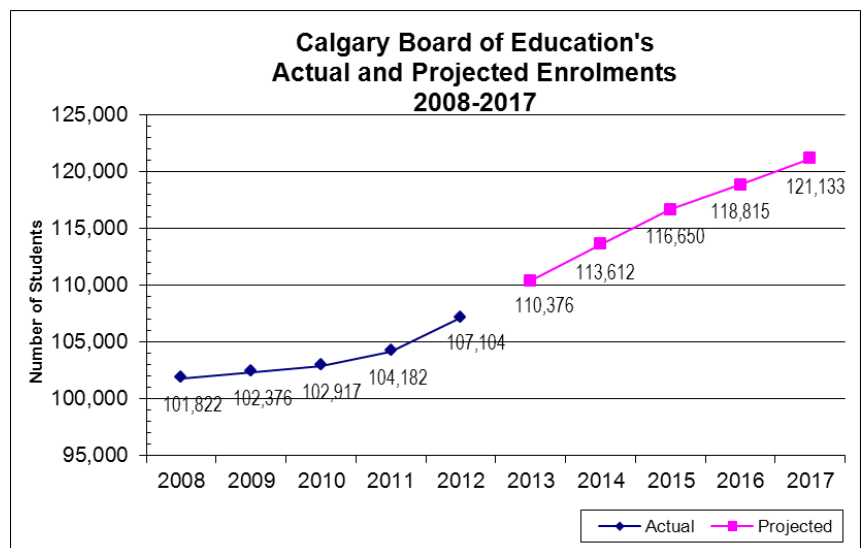

1. Calgary Population

Calgary has experienced tremendous growth over the past decade. One indicator of the magnitude of growth is the increase in Calgary's population by 100,283 persons in the last five years, an average of 20,057 persons per year. The City of Calgary (the City) has forecast that the total population of Calgary will reach 1,238,800 in 2017, an increase of 118,575 persons from 2012. The five-year forecast to 2017 represents an average annual increase of 23,715 persons during this period.

2. Student Enrolment

The CBE's current student enrolment of 107,104 is forecast to increase to 121,133 students in 2017. The largest increase over the five-year timeframe will be Grades 1-3 students and Grades 4-6 students. The Grades 10-12 enrolment is projected to decline slightly over 2013 to 2016 and then increase slightly in 2017.

Note: Enrolment includes Home Education, Outreach/Unique Settings, Chinook Learning and CBeLearn.

3. Calgary Growth and Development

Extrapolating from City forecasts, the following population increases for suburban locations are identified for the CBE's administrative Area:

City Growth Trends by CBE Area 2012-2016	
Area	Population Forecast
Area I	7,500-8,300
Area II	13,200-14,800
Area III	8,200-9,100
Area IV	8,900-9,800
Area V	41,200-45,600

4. Three-Year Education Plan

Alberta Education requires school boards to maintain three-year plans, updated annually. School boards are responsible for carrying out their education plans; for reporting annually to parents, communities, and government on results and use of their resources; and, for using results information to update plans and improve education for students. The Board of Trustees approved the combined Annual Education Results Report 2011-2012 and the Three-Year Education Plan 2012-2015 on December 4, 2012.

5. Schools Under Construction and Approvals

The Province is constructing one senior high school as part of the Alberta Schools Alternative Procurement Phase II. Robert Thirsk High School has been turned over to the Calgary Board of Education for fit-up and is to open for the 2013-2014 school year. Nose Creek, Captain Nichola Goddard, Ted Harrison, and Twelve Mile Coulee, opened at 900 student capacity each for the 2012 – 2013 school year as part of the Alberta Schools Alternative Procurement Phase II.

The following schools have been recently approved by the Province: Copperfield Elementary; Evanston Elementary; New Brighton Elementary; Royal Oak/Rocky Ridge Middle; Saddle Ridge Middle and Northeast High School.

6. Capital Priorities – New School Construction

There are 25 new school construction projects in the Three-Year School Capital Plan 2014-2017.

1.0 INTRODUCTION

The Calgary Board of Education (CBE) is a global leader in public education. The largest school district in Western Canada, the CBE provides a full range of educational services for all instructional programs from Kindergarten through to Grade 12. The CBE addresses the complexity and diversity of 107,104 students (includes Adult Education) through 225 schools with 9,177 permanent employees and an operating budget of \$1,169 million.

Over the past decade, Calgary has seen tremendous growth and economic prosperity. One simple indicator of the magnitude of the growth is that the population of Calgary increased 100,283 persons between 2007 and 2012, at an average of 20,057 persons per year.

The population grew from 1,090,936 in April 2011 to 1,120,225 in April 2012, an increase of 29,289 (2.7%). The population growth consisted of natural increase (9,631 persons) representing approximately 30% and net migration (19,658 persons) which represented approximately 70%.

The City of Calgary's report, Calgary and Region Economic Outlook 2012-2017 (Fall 2012), identifies continued strong growth for Calgary. The economic growth rate is forecast to be approximately 3% to 4% over the next five years. The City forecast indicates the total population of Calgary will reach 1,238,800 in 2017, an increase of 118,575 persons from 2012 total of 1,120,225. The five-year population forecast to 2017 represents an average increase of 23,715 persons per year during this period and represents an increased pace from the previous five-year period.

Calgary Total Population (,000s)										
Actual						Projected				
2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
1,020	1,043	1,065	1,072	1,091	1,120	1,144	1,169	1,194	1,217	1,239

Calgary and Region Economic Outlook 2012-2017 (Fall 2012)

1.1 CBE Student Enrolment

Total enrolment of 107,104 students was reported on September 30, 2012, and 101,628 pre-Kindergarten to Grade 12 plus 5,476 enrolled in Home Education, Outreach and Unique Settings at Chinook Learning Services and CBe-learn. This count included 1,039 students 20 years old or older on September 1 who are currently not eligible for funding.

Total enrolment increased by 2,922 students from September 30, 2011 to September 30, 2012, with notable increase at Kindergarten, Division I (Grades 1-3) and Division II (Grades 4-6). This increase is mainly due to high birth rates, higher than anticipated net migration and a slight increase in CBE's market share.

Parents and students continue to access program choices offered by the Calgary Board of Education. From September 30, 2011, to September 30, 2012, enrolment in alternative programs increased by 1,234 students or 7%. Enrolment in alternative programs is 19,558 of which 10,924 are enrolled in language programs (French Immersion, Spanish Bilingual, German Bilingual and Chinese Bilingual), 5,078 in Traditional Learning Centres and 3,556 in other programs.

The following table provides a summary of enrolments including Unique settings, Outreach Programs, Chinook Learning, and CBe-learn from September 30, 2008, to September 30, 2012.

Five-Year History of Enrolments by Division					
2008-2012					
	2008	2009	2010	2011	2012
Pre-Kindergarten		22	38	51	80
Kindergarten	7,082	7,180	7,459	7,718	8,252
Grades 1-3	21,247	21,693	22,393	23,362	24,444
Grades 4-6	20,680	20,690	20,379	20,525	21,333
Grades 7-9	22,151	22,075	21,647	21,457	21,623
Grades 10-12	25,654	25,670	25,634	25,533	25,896
Sub-Total (pre-k to grade 12)	96,814	97,330	97,550	98,646	101,628
Home Education	203	187	186	189	247
Outreach and Unique Settings	1,634	1,727	1,755	1,797	1,789
Chinook Learning Services	2,492	2,447	2,789	2,935	2,760
CBe-learn	679	685	637	615	680
Sub-Total	5,008	5,046	5,367	5,536	5,476
Total	101,822	102,376	102,917	104,182	107,104

Five-Year Enrolment Projections

CBE's current enrolment of 107,104 students is forecast to increase to 121,133 students by 2017. An increase of 14,029 students is projected averaging 2,800 additional students annually. The largest increase over this five-year timeframe is projected to be in Division I (Grades 1-3) and by Division II (Grades 4-6). Junior high enrolment (Grades 7-9) is projected to decline slightly over the next year and increase again starting in 2014. Senior high enrolment (Grades 10-12) is projected to decline slightly over the next four years and begin to increase slightly starting in 2017.

A summary of the September 2012 actual student enrolments and September 2013-2017 projected enrolments are below:

Five-Year Enrolment Projections 2012-2016						
	Actual 2012	Projected				
		2013	2014	2015	2016	2017
Pre-Kindergarten	80	140	140	140	140	140
Kindergarten	8,252	8,904	8,958	8,811	7,951	7,951
Grades 1-3	24,444	26,015	27,640	29,008	29,378	28,330
Grades 4-6	21,333	22,313	23,376	24,299	25,856	27,471
Grades 7-9	21,623	21,542	21,978	22,621	23,660	24,787
Grades 10-12	25,896	25,812	25,697	25,778	25,677	26,199
Sub-Total (pre-k to grade 12)	101,628	104,725	107,788	110,656	112,661	114,877
Home Education	247	254	262	270	277	282
Outreach and Unique Settings	1,789	1,853	1,909	1,965	2,018	2,044
Chinook Learning	2,760	2,843	2,930	3,016	3,096	3,153
CBe-learn	680	700	722	743	763	777
Sub-Total	5,476	5,651	5,823	5,994	6,154	6,255
Total Student Count	107,104	110,376	113,612	116,650	118,815	121,133

- CBe-learn and Chinook Learning Services accept registrations on an on-going basis.
- All projections are subject to annual review and update.
- Projections use September 30, 2012, enrolments as a base.

Enrolment in Outreach Programs, Unique Settings and CBe-learn assumes current enrolment patterns. Enrolment at Chinook Learning Services is projected to increase slightly over the next five years. Projections for Early Development Centres (pre-k) have been prepared in consultation with the Administration responsible for these programs and are reflective of the growth anticipated over the forecast period.

Projections for Home Education, CBe-learn, Outreach Programs, Unique Settings and Chinook Learning are reflective of the growth anticipated and assume the same level of growth experienced in 2012 will occur over the forecast period. The above mentioned programs/settings are all unique in nature. Chinook Learning and CBe-learn register students continually throughout the year.

Proposed changes to the Alberta School Act, that will give students the option of remaining in school until the age of 21, as well as changes to the definition of student residence will have an impact on future enrolment projections. If passed, the corresponding legislation and policies will be reviewed by the province to ensure a successful transition and implementation. At this time, these changes are not anticipated to take effect until 2014 or more likely 2015 and as such are not reflected in the projections. Once the changes are passed and the timing and implementation are known, the impacts will be included in future district projections.

1.2 Calgary Growth and Development

The City of Calgary supports an actively competitive land market in all areas of the city and there are 24 new and developing municipal communities (Suburban Residential Growth, April 2012) in various stages of development. The large number of concurrently developing communities puts increased pressure on the CBE to meet the expectations of parents for school construction in their community. The report notes that although the number of communities has declined over the last decade, the size of the communities being planned and built today are much larger than they have been historically. Although there are nine fewer actively developing communities today, the land supply is essentially the same as 15 years ago.

The top ten developing communities to receive residential building permit applications in Calgary for 2011 were:

- Skyview Ranch (NE)
- Auburn Bay (SE)
- Aspen Woods (W)
- Panorama Hills (N)
- Cranston (SE)
- Saddle Ridge (NE)
- New Brighton (SE)
- Evanston (N)
- Copperfield (SE)
- Sage Hill (N)

(Source: Suburban Residential Growth 2012-2016, p. A16, A17)

Forecasted Suburban Growth – 2012-2016

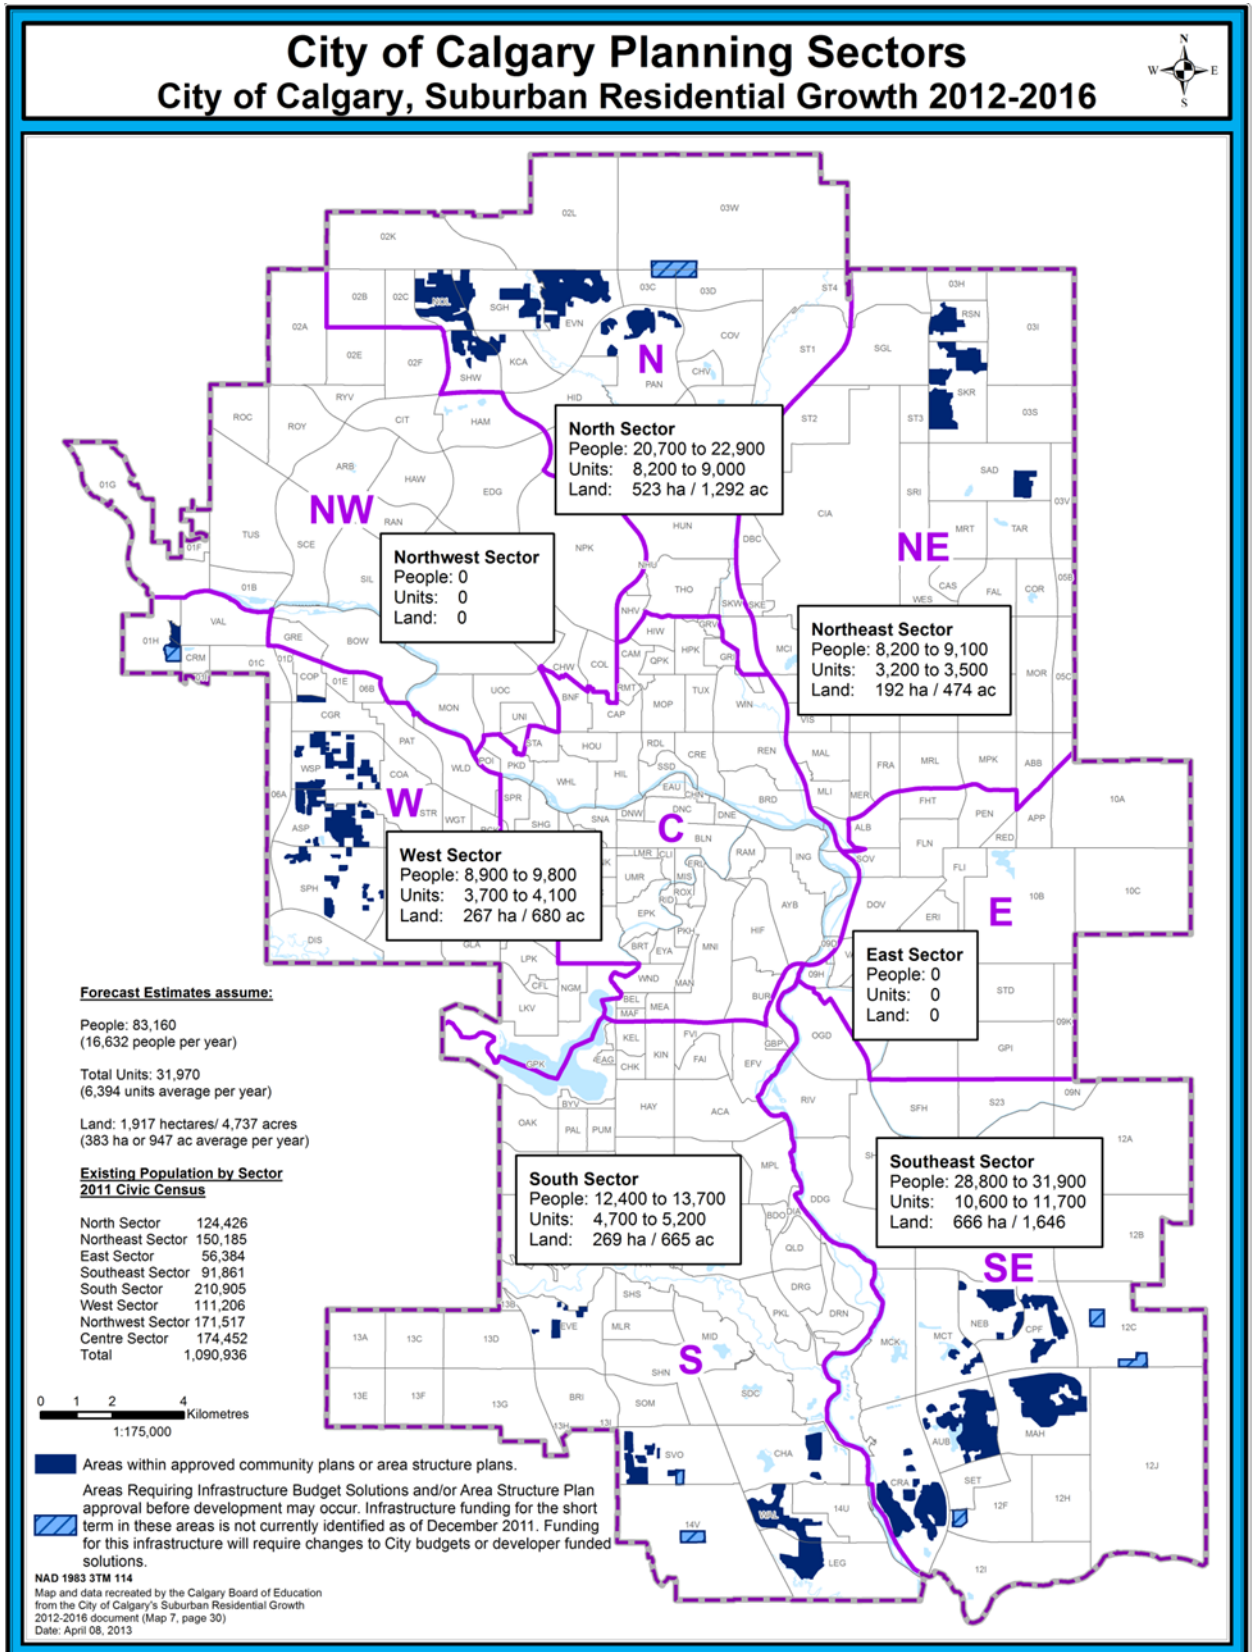

The Suburban Residential Growth 2012-2016 indicates that 100% of the population growth over the past five years (2007-2011) has been in the developing communities. Although the new Calgary Municipal Development Plan supports more intensification into developed areas of Calgary, forecasts over the next five years estimate approximately 95% of the population growth will continue to occur in the new suburbs.

The above report indicates the new suburban areas could accommodate approximately 260,000 persons on the future residential lands, based upon approved plans in place, which represents a 12 to 14 year land supply. In terms of ready to use fully serviced land, approximately 123,600 people could be accommodated which represents an approximate four to six year supply of land.

The figures in the Suburban Residential Growth 2012-2016 (April 2012) are less optimistic than The City of Calgary's Economic Outlook 2012-2017 (Fall 2012) that reflects the new 2012 Census information. The Suburban Residential Growth 2013-2017 that will be prepared by mid 2013 can be expected to have increased population growth to reflect new assumptions.

A summary of the five-year period forecast from the Suburban Residential Growth 2012-2016 for suburban locations is as follows (see Map 1):

City Growth Trends by City Sector 2012-2016				
Sector	Housing Units	Population Forecast	Hectares	Acres
Northwest	0	0	0	0
North	8,200-9,000	20,700-22,900	523	1,292
Northeast	3,200-3,500	8,200-9,100	192	474
East	0	0	0	0
Southeast	10,600-11,700	28,800-31,900	666	1,646
South	4,700-5,200	12,400-13,700	269	665
West	3,700-4,100	8,900-9,800	267	650

Extrapolating from these City forecasts, the following population increases for suburban locations were prepared to determine populations by CBE's administrative Area boundary:

City Growth Trends by CBE Area 2012-2016	
Area	Population Forecast
Area I	7,500 - 8,300
Area II	13,200 - 14,600
Area III	8,200 - 9,100
Area IV	8,900 - 9,800
Area V	41,200 - 45,600

A portion of the north growth for the communities of Nolan Hill and Sherwood will be in the Area I population forecast. Area III includes the Northeast and East sectors. Area V includes the Southeast and South sectors and indicates that approximately half of the City's growth will be in these portions of the City.

1.3 Framework for Growth and Change

The new Municipal Development Plan (MDP), *Plan It Calgary*, was implemented April 1, 2010, and is the overarching policy that documents municipal development and transportation. *Plan It Calgary* intends to reduce the amount of growth allocated to the developing communities, which is essentially 100%, and to intensify the inner-city and established areas with additional population. The 30-year target of the plan for growth into established areas is 33% and the 60-year target is 50% growth to established areas.

Part 5 of *Plan It Calgary* established a framework for growth and change. This is to ensure reprioritizing municipal investment to align with its long-term growth management strategy on how Calgary will grow and develop over the next 60 years. Calgary City Council directed the City Administration to develop a decision framework to determine when to commence planning, financing, and servicing.

The CBE participated in the stakeholder meetings during fall 2011 and all of 2012 as part of the City's "Framework for Growth and Change" process. The City Administration has reported back to the Standing Policy Committee on Land Use, Planning and Transportation (LPT) and City Council throughout 2011 and 2012 on the process and results.

On October 15, 2012 City Council received and approved the growth management prioritization process. This represents an important milestone in the establishment of the complete growth management system for the city of Calgary. There is still significant work that needs to be done for this process to inform Council's planning and infrastructure investment decisions. Specific deliverables over the next year are:

- Land Supply principles (December 2012)
- An analysis of stakeholder feedback on the PUD2012-690 report (February 2013)
- Financing & Funding strategy (Quarter 2 2013)
- Land Supply strategy (June 2013)
- Sequenced GMIS (Fall 2013)

The CBE has advocated, as part of the growth management process, that the City should have more short-term targets (5, 10 and 15 years) to monitor progress toward growth allocated to the developing communities in relation to the inner-city and established areas. This would enable monitoring of short-term and mid-term benchmarks in reaching the 30-year target of the plan for growth into established areas of 33% and the 60-year target of 50% growth to established areas. Intensification of built-up areas, as advocated through the Framework for Growth and Change, may positively impact the population in the established and mature communities and may increase student enrolments for CBE schools in these areas.

The CBE has identified concerns over the past decade, in annual school capital plans, regarding the large number of concurrently developing communities. The City supports an actively competitive land market in all areas of the city and there are 24 new and developing municipal communities in various stages of development. The large number of developing communities puts increased pressure on the CBE to meet the expectations of parents for new school construction in their community. The CBE has indicated more orderly growth could be achieved by phasing growth into a smaller number of communities that are fully completed on a timely basis.

In terms of population increased from the April 2011 Census to the April 2012 Census, there were four developing communities that exceeded 1,000 persons population growth. Panorama Hills had the largest annual increase of 2,396 persons followed by Auburn Bay (1,424 persons), Skyview Ranch (1,185 persons) and Cranston (1,026 persons).

The largest increase in the established communities was Bankview with a population increase of 467 persons. There were seven other inner city and established communities that exceeded an increase of 300 population consisting of Hillhurst (377), Crescent Heights (376), University (370), Penbrooke Meadows (359), Bridgeland/Riverside (340), Bowness (312) and Chinatown (308).

1.4 City of Calgary Annexation

Previously Annexed Lands

The majority of the 36,000 acres annexed to the City of Calgary, from the MD of Foothills in 2005 and MD of Rocky View in 2007, remain outside of the Calgary Board of Education's jurisdictional boundary.

The Minister of Education has identified it is in the best interest of the students to retain the existing school boundaries until urban development warrants change.

The Minister has indicated that annexed lands would be brought into the CBE and Calgary Catholic School District inventory as area structure plans are finalized.

To date, the following areas of the new annexation lands have been added to the CBE jurisdictional boundaries:

- Annexed land in the south was added to the CBE boundary June 25, 2009 and consists of the communities of Walden and Legacy. These future communities will build out to a population of approximately 24,500 to 25,800 persons.
- Recently annexed land in the northwest has been added for a small extension to the Valley Ridge community that will add approximately 500 persons when fully built-out. A ministerial order was received September 26, 2011 to adjust the CBE boundaries.
- Approximately 177 acres of land in the south have been removed from the City and CBE boundaries as part of the Spruce Meadows lands being added to the MD of Rocky View. A ministerial order was received in September 12, 2011 to adjust the CBE boundaries affected by the Spruce Meadows lands.

A map on page 10 identifies these latter locations.

The Calgary City Council has approved regional context studies to guide development in the newly annexed lands.

- The City has approved the East Regional Context Study (April 2009) with an eventual population of 160,000 persons and approximately 22,000 jobs upon full build-out.
- The City has approved the West Regional Context Study (April 2010) with an eventual population of 22,000 people and 7,000 jobs upon full build-out.
- The City has approved the North Regional Context Study (June 2010) with an eventual population of 216,000 persons and approximately 69,000 jobs on full build-out.

In the next five years, population growth is expected to occur primarily in the developing Calgary communities, and there is a planned land supply that can accommodate approximately 260,000 persons. In the long term, the newly-annexed areas will also add approximately 350,000 to 400,000 new residents to the City.

More detailed area structure plans are being undertaken to guide future planning in the annexed lands. CBE planning personnel have been participating in meetings, discussions and plan preparation, to enable long-term school planning in these new plan areas.

The **West Macleod Area Structure Plan** was approved November 30, 2009 and will accommodate a population of approximately 28,000 persons. Planning since that date has been delayed. There currently is an ASP amendment in process for an additional 12,500 persons to the south. The plan amendment is expected at City Council in Spring 2013.

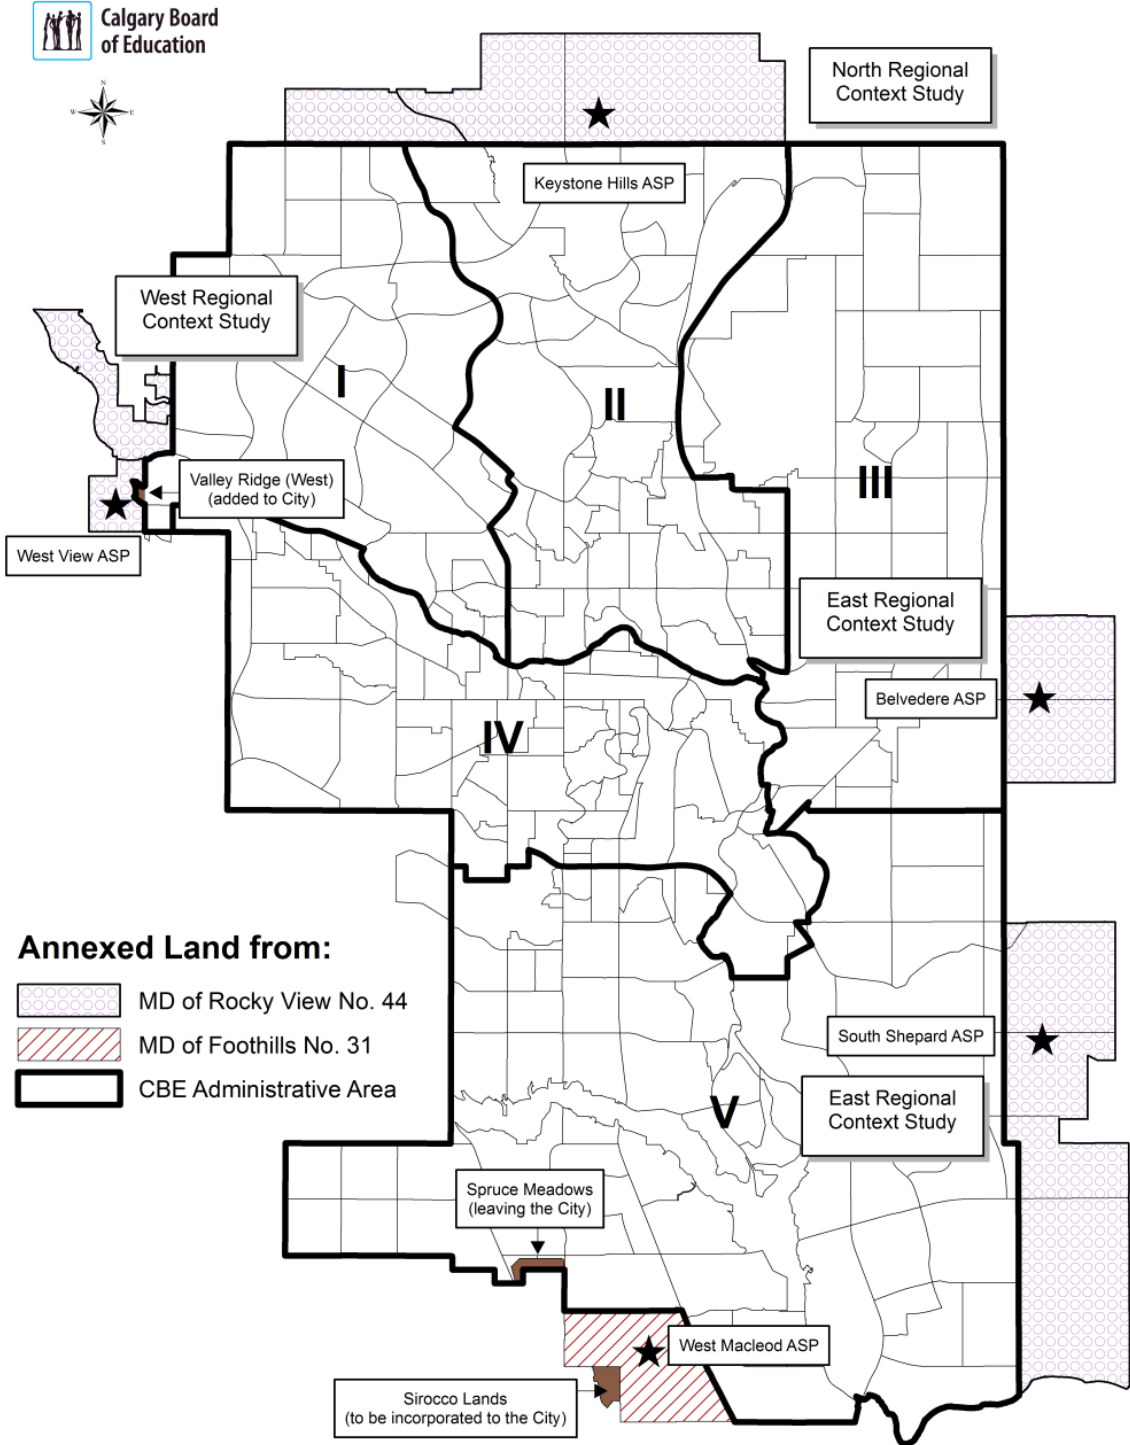

The **Keystone Hills Area Structure Plan** in the north was approved July 16, 2012 and will accommodate a population of approximately 60,000 persons. Outline plans are expected to be submitted in the near future.

The **West View Area Structure Plan** will accommodate a population of approximately 8,300 persons. The ASP was initiated following approval of the West Regional Context Study. The ASP has been on hold since December 2010 while the Province conducts a functional study to determine the location of an interchange that will provide access to the West View area.

The **South Shepard Area Structure Plan** will accommodate a population of approximately 29,000 persons for the north portion of the plan. This plan has been broken into two parts as there are issues related to environmental studies and the landfill site within the study area. The north portion of the plan is expected to be at City Council in spring 2013.

The **Belvedere Area Structure Plan** on the east will accommodate a future population of approximately 61,000 persons. The plan is in nearing completion and timing for approval is to occur in spring 2013.

It is anticipated following approvals of area structure plans and subsequent outline plans, that the CBE and Catholic Separate School District will request, on an as required basis, the Minister to include these lands as part of their respective school boundaries.

2.0 CAPITAL STRATEGIES

2.1 Calgary Board of Education

The CBE is pursuing capital funding opportunities which recognize the changing needs of students and is focused on building strong ties with parents, partners, and the community. More specifically, the CBE recognizes:

- Provincial funding is required for new school construction in new and developing communities;
- Parents desire schools to be closer to home, especially for younger students;
- Increasing public demand for program alternatives and personalized learning; and
- Transitions for students with minimal disruption in order to provide continuity of learning with consistent peer cohorts.

This approach to planning anticipates a system of core elementary feeder schools for local school communities (attendance areas), complemented with middle/junior high, and senior high schools serving large geographic areas. The CBE defines a school community as the population required to sustain a school.

The key drivers of the *Three-Year School Capital Plan 2014-2017* will be to undertake the following types of projects:

- Program Delivery – Projects that were urgently required to enable the delivery of school programs e.g. Career and Technology Studies.
- Community Schools – New schools required in rapidly growing communities in order to minimize student travel times and meet needs for a local school in their community.
- Aging Facilities – Older schools that require modernization, rehabilitation or replacement in order to provide appropriate learning environments for students. It is estimated the cost for the major maintenance and repair of CBE educational facilities is in excess of \$920 million.

A balanced approach for the plan will be developed to ensure CBE requirements are met through new school construction, school modernizations and projects to meet program delivery. High priority program delivery projects are listed below.

- Chinook Learning Services (CLS) – CLS has demonstrated a steady increase in enrolments over the past several years and this trend is expected to continue with changes to the Education Act to extend student funding to 21 years of age. The CBE vision is a major central campus and two other locations in the city.
- Career and Technology Studies – A planned CBE strategy to address new Career and Technology Studies (CTS) curriculum requires approval of modernization projects to be undertaken in schools in each of Areas I, II, III and V. Selected schools will deliver CTS courses and programs at exploratory, specialized and credential levels.
- Christine Meikle School – A replacement school is needed for this unique setting for severe and complex student needs for 12 – 19 year old school students.

- Aboriginal Family Community Centre – A modernization at a school is needed for this program which is open to all students who want an Aboriginal-based education.

2.2 Three-Year Education Plan

Alberta Education requires school boards to maintain three-year plans, updated annually. School boards are responsible for carrying out their education plans; for reporting annually to parents, communities, and government on results and use of their resources; and, for using results information to update plans and improve education for students. The Board of Trustees approved the combined Annual Education Results Report 2011-2012 and Three-Year Education Plan 2012-2015 on December 4, 2012. A summary of Facilities and Capital Plans identifying new school constructions projects and major modernization projects are included in the Three-Year Education Plan.

Long-range education plans will continue to be developed and these plans will form the basis of the annual School Capital Plan and the Ten-Year System Student Accommodation and Facilities Strategy to ensure that programs and services for students are provided in suitable facilities in appropriate locations. Education planning information will be based on: the Three-Year Education Plan; Area Renewal Plans and other program development undertaken through the Chief Superintendent's office, School Support Services, and the respective Area Offices. This information, in conjunction with the Three-Year School Capital Plan, Three-Year System Student Accommodation Plan and facility information, will be used to determine the school programs and facility upgrade strategies for each school.

Facility and capital project plans will be developed through the Facilities and Environmental Services Unit based upon approvals obtained for new school construction, replacement schools, modernizations, facility maintenance, facility upgrades and other projects, as identified in this and other plans approved by the Board of Trustees.

2.3 Administrative Areas and Space Utilization

The CBE has five administrative Areas as indicated on **Map 2**. Within each of these Areas, this Three-Year School Capital Plan will review all new and developing communities for new school construction eligibility. The Province has indicated that utilization is reviewed when evaluating a jurisdiction's capital priorities; however, the 85% utilization rate is not a firm requirement but rather a guideline. Currently, the calculation of school capacities, which affects utilization rates, is under review by the Province.

The CBE desires to use their facilities efficiently and continues to work towards an average 80% utilization rate. Given the constraints of the existing utilization formula and other influencing factors such as the Class Size Initiative, the CBE considers an 80% utilization rate a reasonable target. Currently, the CBE's overall utilization rate by enrolment is 80%. The utilization rate is 75.8% for K-9 students and 94.8% for Grades 10-12 students. The CBE will continue to use planning strategies to improve use of facilities and increase utilization rates in Areas with low utilization.

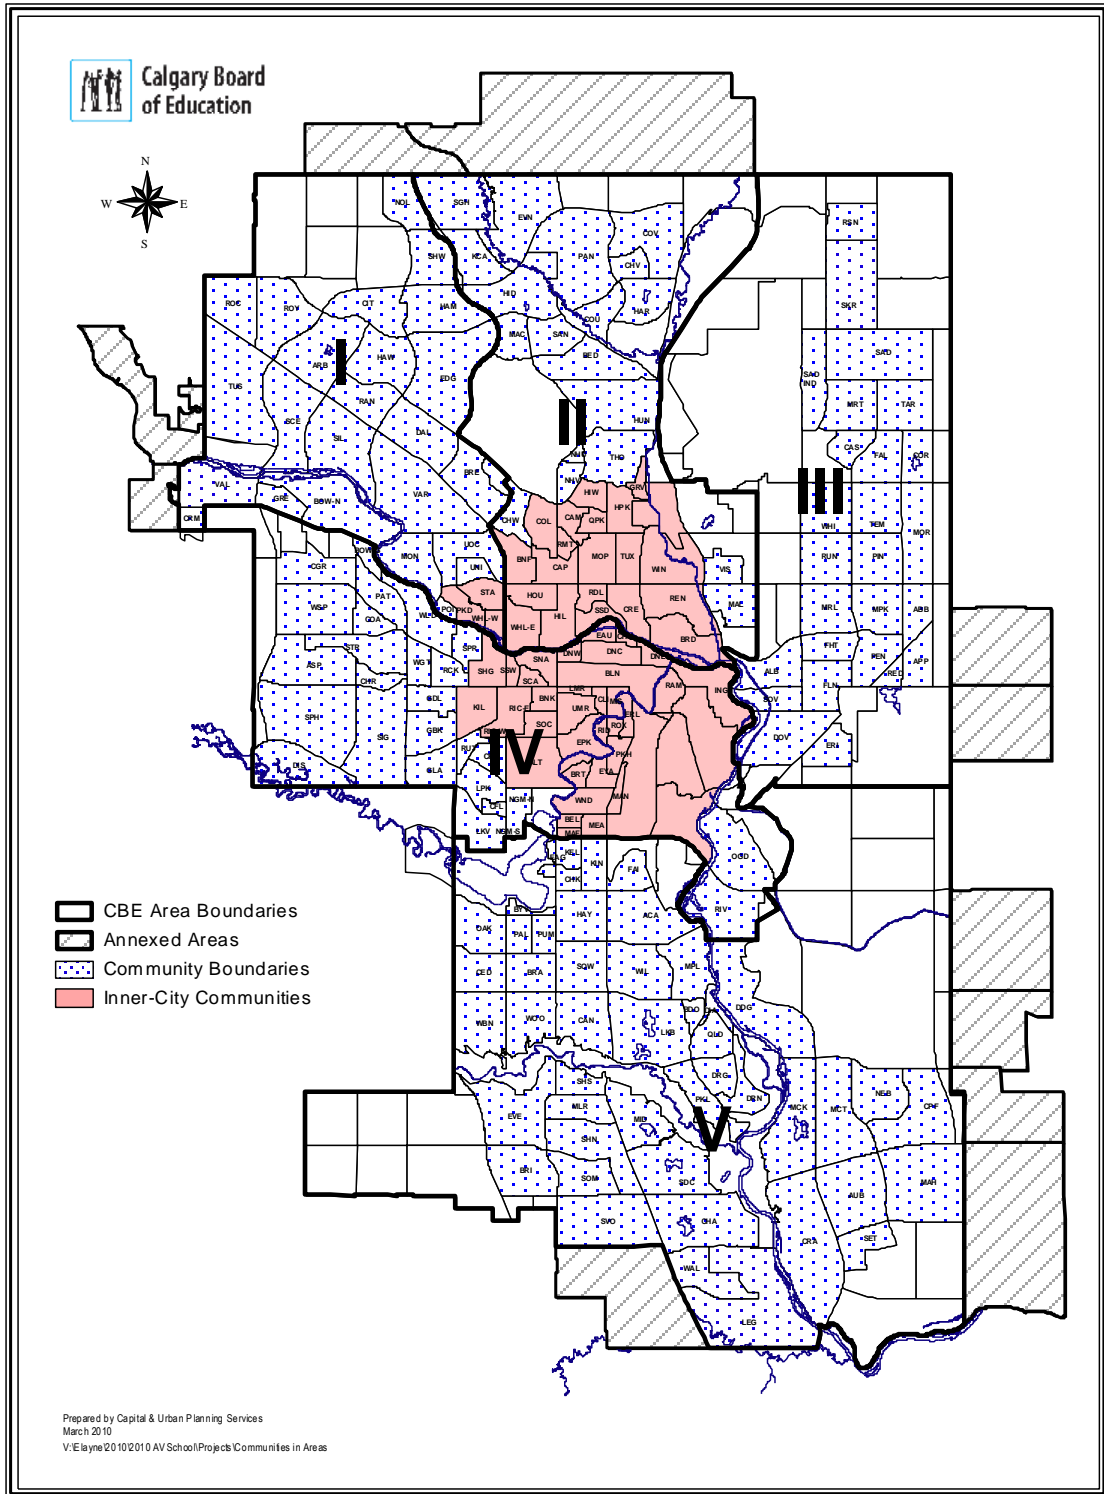

A summary of utilization by enrolment and by residence follows below and is included in detail in Appendix I. Utilization by enrolment identifies the number of students attending schools in an Area expressed as a percentage of the total capacity. Utilization by residence identifies the number of students residing in an Area expressed as a percentage of the total capacity. Projections for 2017-2018 account for additional school capacity through new construction.

Area Utilization by Student Enrolment (Actual & Projected)			
Area	Sector	2012-2013 Actual K-12 Utilization	2017-2018 Projections K-12 Utilization
Area I	Sector 1	68.62%	71.37%
	Sector 2	94.64%	85.33%
Total		82.65%	79.40%
Area II	Sector 3	80.80%	80.32%
	Sector 4	83.78%	84.65%
Total		81.82%	81.92%
Area III	Sector 5	79.04%	84.92%
Total		79.04%	84.92%
Area IV	Sector 6	79.40%	84.66%
	Sector 7	75.47%	76.96%

2.4 Planning and Consolidation of Surplus Space

System Student Accommodation Plan

The CBE has a Three-Year System Student Accommodation Plan to inform appropriate decision-making and timely engagement for community members and parents in CBE accommodation planning. The process applies to and informs recommendations regarding all school and program accommodation issues. A Three-Year System Student Accommodation Plan is developed to support and reflect the Three-Year Education Plan, Three-Year School Capital Plan, and the Ten-Year System Student Accommodation and Facilities Strategy.

Student accommodation needs are identified by the Planning, Transportation & Environmental Services department in consultation with Area Directors. Administration is responsible for engaging internal and external stakeholders regarding student accommodation challenges. The System Student Accommodation Plan 2012-2015 was received for information at the June 19, 2012, Board of Trustees meeting.

Full Day Kindergarten

The Province has recently indicated they would like to review the learning benefits of full-day kindergarten. The Province plans to undertake a review of operational issues to better understand the implications of this possible future programming change.

In terms of the CBE schools, the mandating of full day kindergarten in all elementary schools would have significant planning, accommodation, staffing, transportation, community engagement and cost implications.

Currently, 137 elementary schools provide kindergarten programs. Of these, only 18 elementary schools, the Children's Village School and Emily Follensbee School offer full day kindergarten. Should there be a provincial requirement for full day kindergarten, a number of schools at or near full capacity would have emergent space issues.

Possible impacts on highly utilized schools would be a change in grade levels provided in the schools and increased bus transportation of students. The overall CBE school utilization rate is estimated to increase by approximately three percent with full day kindergarten and there are significant implications for many schools that are approaching, or at 100% utilization. Further detailed reviews of each school, and the cost implications involved, would need to be undertaken by the CBE.

Potential School Space Consolidation

The CBE is strongly committed to effective use of space and resources. Consolidation of schools with low enrolments and the consolidation of programs will continue in future years through the Three-Year System Student Accommodation Plan. Potential school space consolidation will be dependent upon future direction associated with full day kindergarten. The Three-Year System Student Accommodation Plan will identify issues and challenges that may lead to consideration of closures of schools or programs on an annual basis.

Areas with low enrolments require effective strategies for programming for students and, in some cases this is achieved through a school consolidation. In other Areas, a combination of program consolidation through introduction of alternative programs and other strategies is required.

The Robert Thirsk High School is currently being fit-up by the CBE and will be operational for the 2013-2014 school year. This will add 1,500 student spaces to the CBE inventory and programs and accommodation plans for Area I senior high schools will reflect the new high school opening.

The Three-Year System Student Accommodation Plan identifies future accommodation issues and challenges for the five Areas. Strategies identified in this Three-Year School Capital Plan are consistent with the Three-Year System Student Accommodation Plan.

Program Opportunities for Students

The CBE is committed to a balance among equity, access, excellence, and choice within the school system and consequently offers a wide variety of programs for students of all ages. Programs are designed to enrich the lives of students and to promote quality learning. They recognize the many diverse ways of learning and the many interests and abilities of students. Through the Three-Year System Student Accommodation Plan, these programs are initiated where space is available and as close as possible to where demand for the programs exists. A link to the website is as follows:

<http://www.cbe.ab.ca/Schools/ceop/pdfs/SSAP2011-2014.pdf>

2.5 New School Construction and School Approvals

The Province undertook four middle schools and one senior high school as part of the Alberta Schools Alternative Procurement Phase II.

The four middle schools; Nose Creek, Captain Nichola Goddard, Ted Harrison, and Twelve Mile Coulee, opened at 900 student capacity each, for the 2012 - 2013 school year.

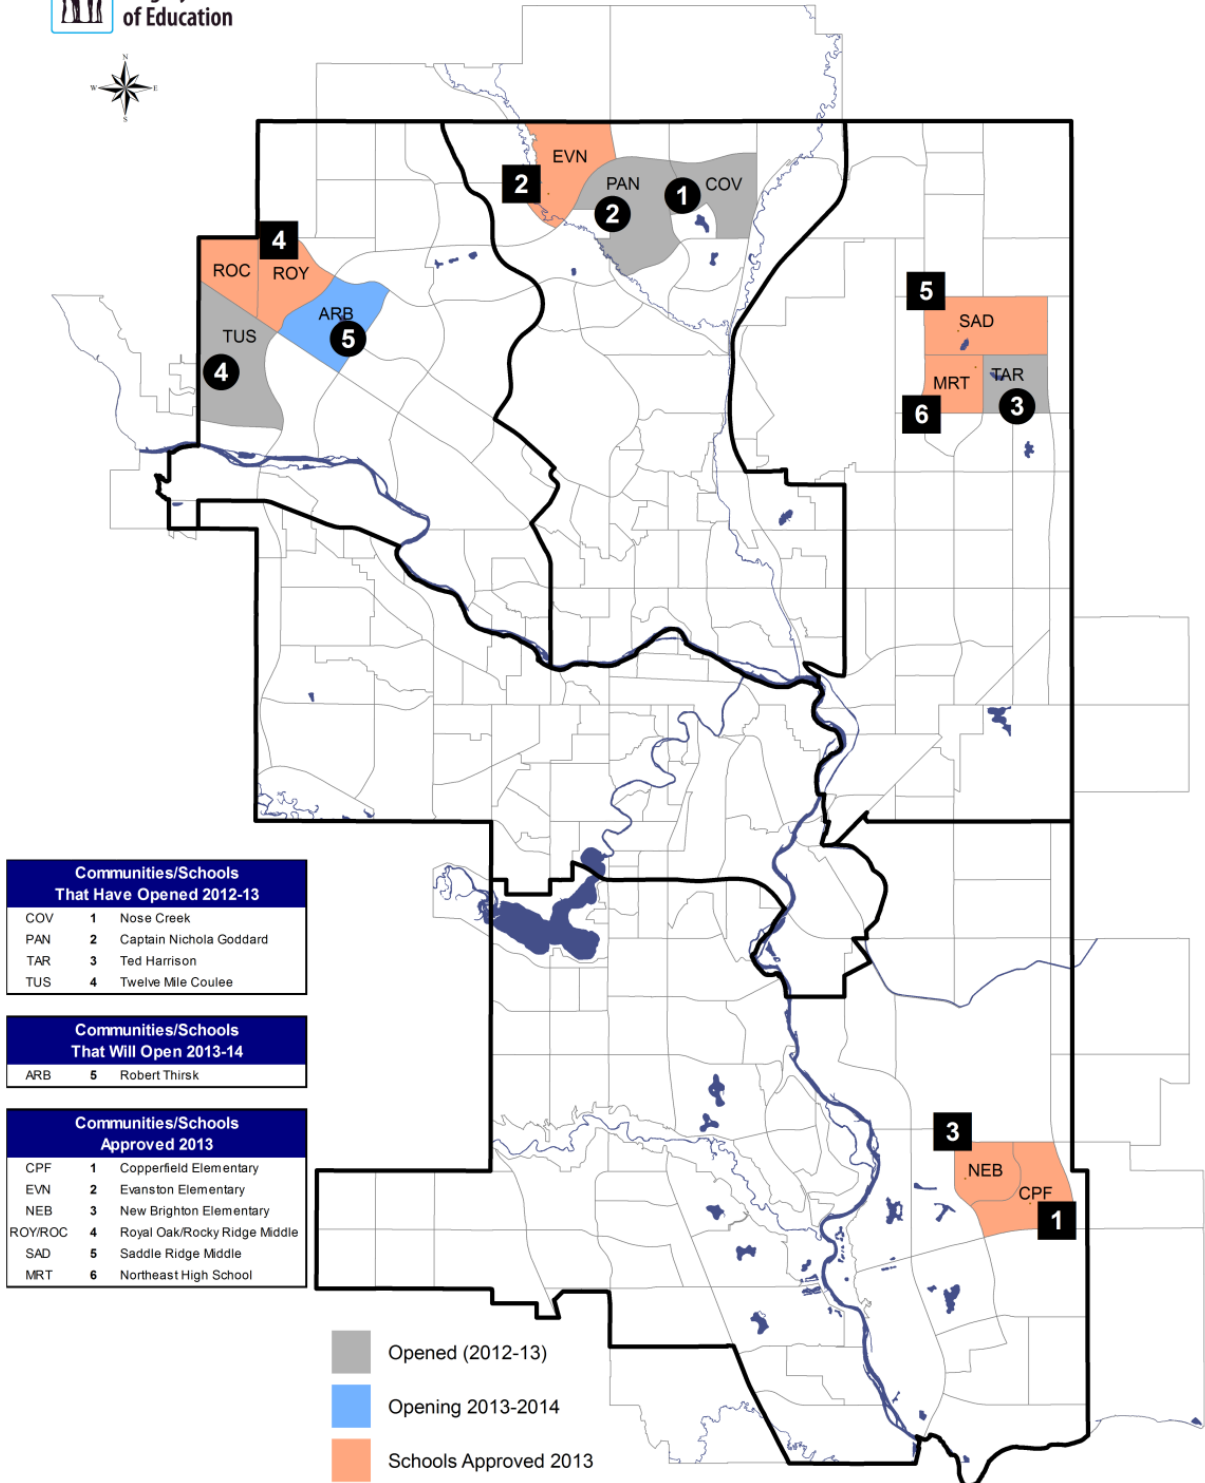

The Robert Thirsk High School with a 1,500 student capacity for Grades 10-12 is to open for the 2013-2014 school year.

The following schools have been recently approved by the Province: Copperfield Elementary; Evanston Elementary; New Brighton Elementary; Royal Oak/Rocky Ridge Middle; Saddle Ridge Middle and Northeast High School.

Map 3 identifies the location of schools that opened for the 2012-2013 school year, and the future school opening for the 2013-2014 school year.

Map 3

School Construction Projects

Prepared by: Planning, Transportation and Environmental Services
 April 8, 2013
 Map: School Construction Projects.mxd

2.6 School Major Modernization

School major modernization projects provide for the renovation of whole or part of a school building for present and future educational programs to address physical obsolescence and/or improve functional adequacy and suitability. School major modernization projects should not exceed 75% of the replacement value of the school building as per provincial guidelines.

A modernization of Lord Shaughnessy High School to enable the delivery of the new Career and Technology Curriculum that was started in April 2010, is complete. The completed construction achieved the following modernizations:

- New entranceway and foyer addition
- Learning Commons (completely new construction)
- Modernized all shop areas
- Complete interior renovation upgrades

A modernization of three school facilities to accommodate Chinook Learning Services was approved in 2011 for \$10.5 million. This project is currently in the planning stages and additional funds to complete the project are requested as part of this plan.

From the 239 CBE-owned facilities, 235 are school buildings. One hundred and thirty-five of the school buildings were built before 1970. This represents 57% of the school building inventory. The current inventory by decade of CBE school buildings is shown in the following graph:

Current School Building Inventory by Decade

In 2004, the Province undertook a rolling condition assessment of schools in the Renewal Capital Asset Planning Process (RECAPP) and planned to audit CBE facilities every five years. In the spring of 2009, Alberta Infrastructure recommenced evaluations starting with the former 2004 assessments, thus continuing the five-year assessment cycle. Approximately 40 to 50 facilities are audited every year. Findings of the re-evaluation are incorporated into maintenance, modernization, and facility planning for the CBE projects.

There are 25 modernization projects that have been included as part of this year's Capital Plan.

A planned CBE strategy to address the new Career and Technology Studies (CTS) curriculum requires approval of modernization projects to be undertaken in high schools in each of Areas I, II, III and V. These schools require priority placements for major modernization projects in order to deliver CTS courses to students in each of the four Areas. The Lord Shaughnessy High School modernization in Area IV is the first modernization project undertaken for the Career and Technology Studies curriculum. As well, the Chinook Learning locations and the Aboriginal Family Community School have been placed in priority order. The remaining modernization priorities for the School Capital Plan are ranked. Key factors for ranking and the schools are in Appendix II.

2.7 Collaborative Initiatives with The City of Calgary

For many years, the CBE and The City of Calgary have enjoyed a strong working relationship. This relationship involves both city-wide initiatives and specific initiatives focussed on property, leasing, and infrastructure. The following initiatives are examples of the CBE working together with the City:

- The CBE is on the Joint Use Coordinating Committee with the City and the Calgary Catholic School District that deal with joint-use school reserve sites.
- The CBE and the City participated on a Provincial Working Committee with the City of Edmonton's representatives to pursue the use of vacant surplus school envelopes to accommodate a range of community service-based uses. The CBE has returned vacant school sites to the City, and the City is evaluating sites for open space needs and/or community service uses.
- CBE representatives have been involved in city-wide initiatives such as the new Land Use Bylaw, annexation and *Plan It Calgary*. The CBE has participated recently with other stakeholder groups on "Framework for Growth and Change" activities that are currently being dealt with at City Council.
- The CBE and Calgary Catholic School District are involved with the City on a study to review traffic, parking and safety around school sites. The study is in the early stages to develop a scope and work plan, and the City is undertaking the lead role on the study.
- The CBE and the City are involved in ecologically friendly initiatives that represent a mutual commitment to responsible environmental stewardships. In this domain, the CBE's Eco-Team meshes well with the City's commitment to responsible stewardship of the Calgary environment. The CBE's Eco-Team was awarded the 2009 Emerald Award in the Government Institution category.

3.0 NEW SCHOOL CONSTRUCTION CAPITAL PLAN CRITERIA

The CBE defines a school community as the population required to sustain a school. In the new and developing municipal communities, elementary school communities generally reflect municipal community boundaries. The junior high and middle school communities can serve one large municipal community or two or more small-to-medium-sized municipal communities. In the inner-city and established areas, school communities tend to cover larger geographic areas for elementary, junior high, and middle schools, and do not always align with municipal community boundaries as there is a large range of municipal community sizes and demographics.

A review of the ranking methodology has been undertaken and used for preparation of the Three-Year School Capital Plan 2014-2017. The following has been considered in the review of the methodology.

- At the time of the review (January 2013) there had not been a new elementary school approval for over five and a half years (June 2007) or a middle school approval for over five years (January 2008). The lack of school approvals has resulted in large numbers of pre-school students, K-4 students, and Grade 5-9 students that have moved beyond the pre-school and K- 9 student thresholds of the new school construction ranking criteria.

As well, the maximum capacities of elementary schools and middle schools have increased over the years. Upper threshold for points has been increased to account for ever increasing pre-school children, K-4 and Grade 5-9 enrolments and larger school capacities.

- Community sizes have been increasing the past ten years. This is documented in the City's Suburban Residential Growth 2012-2016 document and some new communities are projected to exceed 30,000 population (Mahogany, Skyview Ranch).

Communities in the 25,000 population plus range will have a significant advantage over average to large sized communities of 10,000 - 20,000 on annual community growth and percent build-out measures. The matrix for percentage build-out of future community growth has been removed and the number of CBE K-4 and Grade 5-9 students is only considered.

- The annual three-year community growth measure is still considered but lessens the impact of growth with 10 points instead of 15 points.
- Median Travel Time, Bus Receivers, Existing K-4 Schools and Grade 5-9 Accommodation continue to be retained as important measures. Points will be given to bus receiver plans for communities that are anticipated to have greater than one bus receiver within two years of the current school year, rather than the current year that was previously used.

3.1 Construction Planning Criteria: Kindergarten to Grade 9 Schools

There are two types of criteria in the evaluation process used to rank school communities for capital building priorities in the Three-Year School Capital Plan. These are as follows:

1. **Eligibility Criteria** acts as a screening filter for new capital projects and must be met before a school community evaluation proceeds to the ranking phase.
2. **Ranking Criteria** that will be used to further evaluate and prioritize new capital projects.

Eligibility Criteria

Eligible School Communities

For the Three-Year School Capital Plan 2014-2017, all new and developing municipal communities will be ranked for new school construction. Inner-city and established areas are not ranked.

Most municipal communities have an elementary site and are ranked individually as a school community. In certain cases, two small municipal communities form one school community where they do not exceed the community population threshold of approximately 10,000 people. In the case of middle/junior high schools, adjacent municipal communities can form one school community where they do not exceed the community population threshold of approximately 24,000 people. Community build-out projections may vary from year to year due to ongoing adjustments to densities and other factors as determined by the City. Large municipal communities that can sustain a middle/junior high school are ranked individually as a school community.

Accommodation Options

This criteria is used to evaluate student accommodation options for eligible school communities. There should be a logical progression from an elementary (K-4) school to a middle school (Grades 5-9) in order to allow students to progress to higher grades. In some cases, an accommodation option may exist in a nearby community and a school community may not need to be ranked for new school construction.

Ranking Criteria

For school communities that meet the eligibility criteria, a ranking is applied based upon criteria identified in three categories: the Community Growth Profile; Busing and Travel Time; and Accommodation. Points for each of the profiles are totalled and used to rank priorities for new school construction.

- **Community Enrolment and Growth Profile**

Point assignments are given to school communities based on growth factors. Based on this information, three categories have been developed for ranking purposes:

- **K-4 Ranking**

- Declared public pre-school census
 - K-4 students
 - Three-year community population growth

- **Grade 5-9 Ranking**

- K-4 students
 - Grades 5-9 students
 - Three-year community population growth

- **Busing and Travel Time**

Point assignments are given to school communities based on Busing and Travel Time assessment. Based on this information, two categories have been developed for ranking purposes for elementary and middle school ranking:

- Median travel time
 - Number of bus receivers projected to occur within the next two year period

- **Accommodation Available for a Community**

Two additional categories exist for middle school ranking to reflect continuity of accommodation plans:

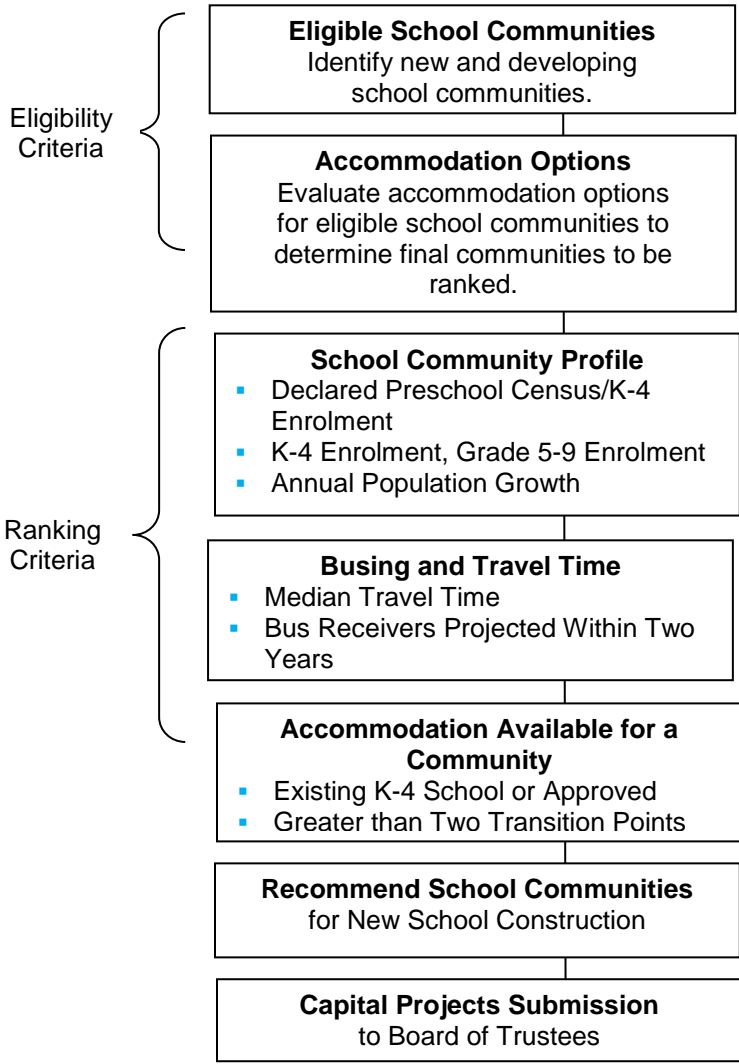

- Points will be awarded if an existing K-4 school has been approved or constructed in a community.
 - Points will be awarded if students have more than two transition points for schools (e.g., K 4, Grades 5-6, and Grades 7-9) rather than one transition point. (e.g. K-4, Grades 5-9)

The option exists for the placement of priorities for new school construction.

- Senior high schools are not ranked using point criteria, but are recommended on the priority list based on need.
 - Schools with unique settings or enrolments that cannot be easily ranked are also placed on a priority basis.
 - Extenuating circumstances may require a placement priority (i.e. site not ready, provincial approval not aligned with CBE priorities) for an elementary or middle school.

A flow chart summarizing the evaluation process for recommended new school construction follows:

**Three-Year School Capital Plan 2014-2017
New School Construction Evaluation Process**

3.2 Construction Ranking: Kindergarten to Grade 9

The list of top-ranked school communities for Kindergarten to Grade 9 to be included in this year's Plan are below:

School Communities					
Rank	Community	Points	Area	Sector	Grade
1	Panorama Hills ⁽²⁾	145	II	4	K-4
2	Tuscany ⁽²⁾	135	II	1	K-4
3	New Brighton/Copperfield Middle	100	V	9	GR5-9
4	Auburn Bay	95	V	9	K-4
5	McKenzie Towne Middle	95	V	9	GR5-9
6	Evergreen Middle	90	V	9	GR5-9
7	Cranston Middle	90	V	9	GR5-9
8	Springbank Hill	85	IV	6	K-4
9	West Springs/Cougar Ridge Middle	75	IV	6	GR5-9
10	Saddle Ridge ⁽²⁾	75	III	5	K-4
11	Cougar Ridge	70	IV	6	K-4
12	Martindale ⁽²⁾	70	III	5	K-4
13	Country Hills/Harvest Hills**	65	II	4	K-4
14	Silverado	65	V	9	K-4
15	Aspen Woods	65	IV	6	K-4
16	Evanston Middle	65	II	4	GR5-9
17	Bridlewood Middle*	65	V	9	GR5-9
18	Springbank Hill/Discovery Ridge Middle	60	IV	6	GR5-9
19	Signal Hill Middle	55	IV	6	GR5-9
20	Kincora	50	II	4	K-4
21	Skyview Ranch	45	III	5	K-4
22	Harvest Hills/Country Hills**	45	II	4	GR5-9
23	Evergreen ⁽²⁾	45	V	9	K-4

Notes: ⁽²⁾ Indicates second K-4 school.

* Accommodation strategy to another community

** Combined Country Hills/Harvest Hills into K-9 grade configuration

A K-4 elementary school will typically have a 600 student capacity consisting of a 300 student capacity core and a 300 student capacity modular addition in 12 units. A Grade 5-9 middle school will typically have a 900 student capacity consisting of a 500 student capacity core and a 400 student capacity modular addition in 16 units. Adjustments to school capacities may occur, as required, for smaller sized communities.

CBE school communities ranked for elementary and middle/junior high schools must have a site available and have a student population large enough to sustain an elementary or middle/junior high school per the ranking criteria. New school construction projects for the top-ranked school communities have been identified

in Section 4.0. Details of ranking for all school communities with points are included in Appendix III.

In the case of a tie in ranking:

- An elementary school ranking for a community will have priority over a middle school ranking.
- A community without a school will be given priority over a community with an approved school or existing school.
- A community with a middle school ranking will be given priority over a community with an approved or existing elementary and middle school.
- Further ties will be broken on total points of the first two community ranking categories. In the case where it is still tied, the first community ranking category points only will be used.

3.3 Construction Planning Criteria: Senior High Schools

The Area-based approach is used to evaluate projects for new senior high school capital priorities. Utilization rates are listed below:

Senior High Area Utilization		
Area	Residence Utilization	Enrolment Utilization
Area I	153.22%	100.90%
Area II	64.09%	99.35%
Area III	141.67%	88.52%
Area IV	84.01%	93.20%
Area V	100.74%	92.86%

Notes:

- Student residence and enrolment as at September 30, 2012
- Capacity is based on Alberta Infrastructure's Area, Capacity and Utilization Report

Area I indicated a very strong demand based upon 153% utilization by residence and 101% utilization by enrolment. This demand will be met with the opening of the new Robert Thirsk High School to open in the northwest for the 2013-2014 school year.

The greatest demand for new senior high school construction is a 1,800-capacity senior high in the northeast in Area III. This demand will be met by the recent approval of the Northeast High School to be constructed for the September 2017-2018 school year. Utilization rates for the northeast are 142% utilization by residence and 89% utilization by enrolment. Area III has the greatest priority with only three high schools. This approval will enable students from Castleridge, Coral Springs, Falconridge, Martindale, Taradale and Saddle Ridge to be able to be accommodated closer to home. Currently these students are bussed to Area II high schools.

There is also demand in Area V based upon 101% utilization by residence and 93% utilization by enrolment. Sector 9 has a utilization rate of 242% by residence (Appendix I), and is only served by Centennial High School in the south. There is no high school in the far southeast.

There is a demand in Area II, as well to locate students closer to home. Sector 4 has an utilization by residence of 252%, and is only served by John G. Diefenbaker. Area II has a utilization by residence of 64% and utilization by enrolment of 99%.

3.4 Construction Priorities: Senior High Schools

Senior high schools (see **Map 4**) are not ranked using point criteria but are recommended on the new school construction priority list based on need.

Southeast High School

A new high school is required in the far southeast. The southeast sector is the fastest growing area in the city, which is expected to increase approximately 28,800 - 31,900 persons over the next five year time frame. This represents 35% of the forecast city growth in terms of total housing units. Development in the five to ten year time frame is expected to continue in the 35% range. Sector 9 of Area V has a large student population by residence with 4,373 senior high students and is only served by Centennial High School in the far south with a capacity of 1,807 students.

Southeast communities, north of Highway 22X, consist of McKenzie Lake, Douglasdale/Glen, McKenzie Towne, New Brighton, Copperfield, and all students are designated to Lord Beaverbrook High, located in the Acadia community. These communities have a build-out population of 72,000 persons and currently have 1,278 students attending CBE high schools for Grades 10 -12. Three of these communities are early in their growth cycle and student numbers will continue to be in this range and/or greater over time.

Students residing in the communities south of highway 22X consist of Cranston (designated to Lord Beaverbrook High), Auburn Bay (designated to Dr. E.P. Scarlett High) and Mahogany (designated to Henry Wise Wood High). These three communities have a build-out population of 70,000 persons and currently have 289 students attending CBE high schools for Grades 10 -12. Auburn Bay and Mahogany are in the early stages of development while Cranston is approximately 50% built-out. Student high school numbers will increase significantly over time.

A 25 acre senior high school site is located in the Seton community near the new Southeast Hospital. A future City recreation centre is on the same site as the high school. A build-out population of 60,000 - 70,000 people can generate 1,800 students in Grades 10-12 to be accommodated in the high school. Based on a mixture of established, new and developing communities, a new high school will operate at 100% capacity for many years to come. Future accommodation plans and designated communities will be developed over time based on the timing of the new school opening and number of students in nearby communities.

North High School

A new high school is also required in the far north to provide accommodation closer to home for students in outlying areas. The north sector is the second fastest growing area in the city, which is expected to increase approximately

20,700 - 22,900 persons over the next five year time frame. This represents approximately 27% of the forecast city growth in terms of total housing units.

Area II is the least utilized area in the City at the high school level with a 64% utilization rate (Appendix 1, Table 2); however, the schools are not in close proximity to where the students reside. Sector 4 of Area II, consists of the northernmost communities and has a large student population by residence with 3,278 senior high students and utilization by residence of 252%. John G. Diefenbaker, located at 64 Avenue and Centre Street N is the only high school in Sector 4 with a capacity of 1,300 students.

Sector 3 is also in Area II and has four senior high schools and a very low utilization by residence of 24%. This is due to four high schools in Sector 3 with a capacity of 6,082 student spaces and only 1,453 students in the sector. This large amount of capacity makes the North High School less of a pressure point than the Southeast High School. This capacity is somewhat misleading as William Aberhart High, with a capacity of 1,599 student spaces, is in Sector 3 and essentially serves northwest students in Area I; however, utilization by residence would be still in the 32% range with William Aberhart removed from capacity.

The primary catchment population for a north high school would be the Northern Hills communities, consisting of Harvest Hills, Coventry Hills, Country Hills Village, Country Hills (north/south) and Panorama Hills as well, the Hidden Valley community to the west. These five communities have a build-out population in the range of 65,000 persons and currently have 1,527 students attending CBE high schools for Grades 10 - 12. Four of the above communities are essentially built-out and Panorama Hills is nearing completion at 85% built-out.

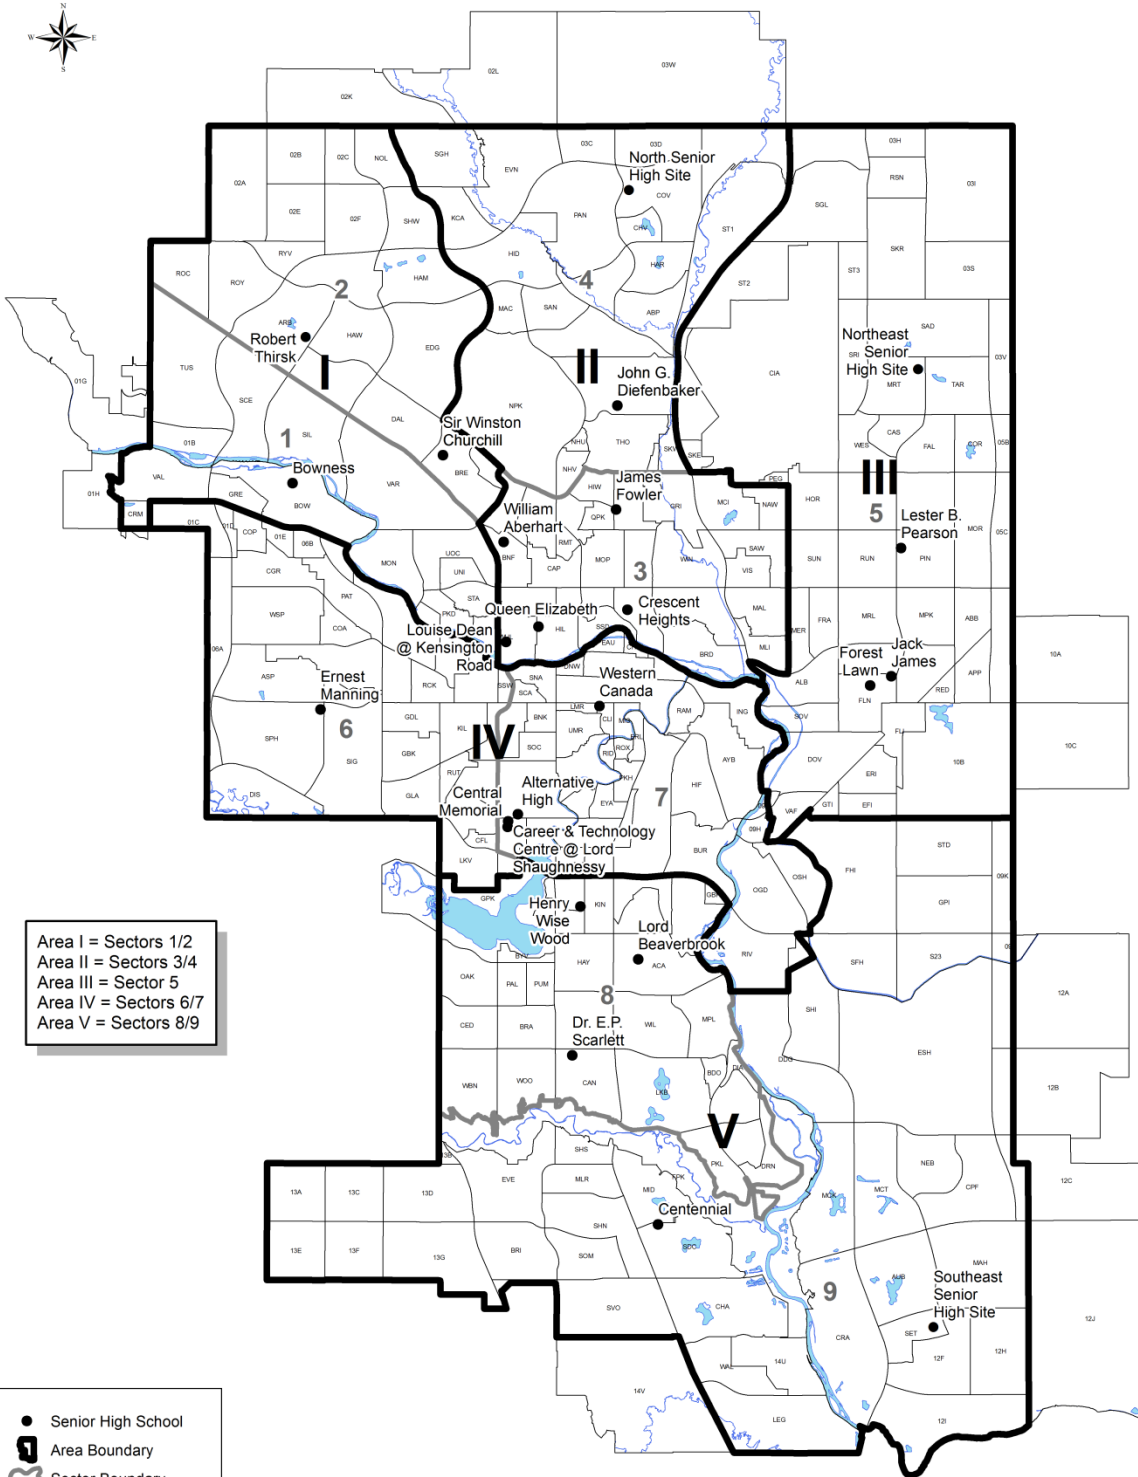

The communities above attend four different CBE schools in Area II consisting of Crescent Heights (Coventry Hills, including Country Hills Village, Hidden Valley), Queen Elizabeth (Country Hills - south) James Fowler (Country Hills – north) and John G. Diefenbaker (Panorama Hills, Harvest Hills). John G. Diefenbaker is the closest school in the Huntington Hills community. Students attending Crescent Heights and Queen Elizabeth having long travel times to the inner city communities north of the Bow River in Crescent Heights and West Hillhurst.

The earliest a Northeast High School could be expected to open will be by the 2017- 2018 school year. There are currently 1,059 students from the northeast communities attending James Fowler High. Projections in this range will continue and it is expected James Fowler will lose up to 1,000 students when the Northeast High School opens. This will enable space in James Fowler to be available for students from communities of Coventry Hills, Country Hills Village, Hidden Valley and/or Country Hills south as space permits.

A 23.6 acre senior high school site is located in the Coventry Hills community on Coventry Hills Way NE. Based on a mixture of established, new and developing communities, a new North High School will operate at 100% capacity for many years to come.

Senior High Schools and Future Senior High Sites Located within Administrative Area and Sector Boundaries

4.0 THREE-YEAR SCHOOL CAPITAL PLAN 2014-2017 – SUMMARY

Capital projects are reviewed and prioritized by the Ministry of Education prior to being submitted to the government's Capital Planning Initiative process led by the Treasury Board. Projects are first reviewed for accuracy and clarity and Provincial staff may meet with school jurisdictions to obtain further information as required.

Alberta Education will prioritize project requests by first considering school jurisdiction priorities and then the following criteria:

- Health and Safety
- Building Condition
- Utilization Rates
- Enrolment Projections
- Education Program Delivery
- Additional Information

Alberta Education then prepares the annual submission for the Provincial Capital Planning Initiative. All government projects are evaluated and prioritized using a Project Rating System consisting of program delivery, infrastructure, performance, economical, and financial impacts.

An in-depth review of the ranking rationale assigned to each capital project is undertaken by a cross-ministry committee, resulting in a recommendation being submitted to the Deputy Minister Capital Planning Committee, and then to the Treasury Board Capital Planning Committee. Provincial Caucus reviews the Treasury Board recommendations and, ultimately, approves the Provincial Capital Plan.

This section provides a summary of recommended new school construction and major modernization projects. Table 1 (New School Construction) and Table 2 (School Modernizations) provides a summary of the recommended projects and project costs are based upon 2012 Alberta Infrastructure support prices. Sections 5.0 and 6.0 provide details of the recommended projects.

Projects are listed in order of priority. Until recent approvals on May 1, 2013, there has not been an approval since January 30, 2008, for new school construction. Despite the approvals, there is still a large backlog of priorities. Details of modernization rankings are in Appendix II and details of new school construction priority rankings are identified in Appendix III.

The sections that follow this summary (Sections 5.0 and 6.0) describe the community and school profiles in order of priority. The key maps in the top right corner of the page depict the location of the community described for new construction projects. The light-shaded areas represent all the new and developing communities in Calgary.

The following tables provide a summary of the new school construction and major modernization projects recommended for funding and these are identified on **Map 5 and Map 6**.

Table 1: New School Construction					Number of Years Listed in Capital Plan
Three-Year School Capital Plan 2014-2017 Priorities					
Priority Ranking – Project Description					
YEAR 1					
Community/School	Grade	Project Type	2013 Cost (\$)

5.0	2014-2017 SCHOOL CAPITAL PLAN
New Construction	
Priority C-1 Christine Meikle	
School Community / Enrolment Profile	
<p>The current Christine Meikle School facility is located in the community of Bridgeland/Riverside, and is presently leased from the City of Calgary. This program functions as a unique setting for students with severe and complex needs. The program draws junior/senior high school students (ages 12 to 19) from all areas of Calgary.</p> <p>The curriculum includes development of communication skills, sensory-motor skills, functional academics, work experience and pre-vocational abilities, travel training, and adaptive physical education. A personalized progressive curriculum is implemented based on the individual needs of each student. Instructional accommodations may include the use of assistive technology, augmentative communication systems and individual small group instruction. The staff, students, and their families also receive consultative support from Regional, Educational, Assessment and Consultation Services (REACH) for program development.</p> <p>The new school considers a student population of 90 to 125 students with a weighted enrolment of 375 (by 2018):</p> <ul style="list-style-type: none"> four classes (25 +/-) non-ambulatory emerging pod/developing pod students six classes (40 +/-) ambulatory developing pod students five classes (35 +/-) ambulatory maturing pod students (including space for higher functioning Autism Spectrum Disorder students from the Communication, Sensory and Social Interaction program). 	
Facility Description	
Due to the size and condition of the current leased building that is being used, a long-term dedicated facility is required for the school program in a new facility.	

Projected Enrolment (2013 – 2021)

Year	GR7	GR8	GR9	GR10	GR11	GR12	19 YRS	20 YRS	21YRS	Total GR7 to Age 21
2012	3	13	11	17	14	18				76

5.0	2014-2017 SCHOOL CAPITAL PLAN
New Construction	
Priority C-1 Christine Meikle	
Recommendation	
<p>The proposed new school facility for the current Christine Meikle program will consider a student population for up to 125 students by 2018. Because of the needs of each the student and staff member, the focus of this special education program, considering the cross-over it has with special needs/medical requirements, will create a state-of-art sustainable facility.</p> <p>This new school facility will incorporate more than just barrier-free accessibility, but focus on the key aspect of open space and flow. The open spaces and special dedicated rooms will function to meet the specific needs of both students and staff. The required estimated space for the facility is approximately 4000 m².</p> <p>The new school facility will consider the following aspects:</p> <ul style="list-style-type: none"> ▪ Appropriate site: the sought site should be one that is flat/level with ample space for loading and unloading of buses; provides adequate on-site parking; vehicle flow and turn around space; playground and open space amenities (i.e.: naturalization areas). ▪ Structurally appropriate facility: single storey structure with high walls to create internal open spaces that are visually pleasing and observable; sound barrier materials will be incorporated; rooms will have access to natural lighting. Such a facility will require load bearing elements to accommodate both health care and mobility equipment. ▪ Architectural components will provide: a covered exterior entrance way for vehicle pick-up/drop-off; large exterior windows and doors for natural light and access. The facility will accommodate space for water therapy; work experience and life skills training; recreational/play spaces (both internal and external). There will be dedicated rooms for: education training, behavioral management, administration, care-providing, medical provision services, etc. ▪ Interior spaces are to be large and functional. Hallways and corridors are to be broad and open to allow for both people and equipment flow. Ample storage and resource areas will be provided for. There will be dedicated sensory rooms for educational and recreational applications. ▪ Mechanical systems are to include: high volume HVAC systems for rapid air exchange, cooling and heating; mechanical rooms and service areas will be segregated from the operational aspects of the facility; large enough to accommodate water therapy (swimming pools, etc.); LEED elements will be incorporated in the facility. ▪ Electrical systems are to include: state of the art monitoring systems; sensory lighting systems with LEED elements; applicable sound and communication systems; electrical components to provide services and mobility (ie; chair lifts, hoists, etc.). <p>The total project cost is estimated to be \$24,000,000.</p>	

5.0	2014-2017 SCHOOL CAPITAL PLAN
New Construction	
Priority C-2 Panorama Hills Elementary ⁽²⁾	
School Community Profile	
<p>Panorama Hills Community began development in 1996 and is located north of Coventry Hills Boulevard and west of Harvest Hills Boulevard NW.</p> <ul style="list-style-type: none"> ▪ As of the April 2012 Census, the total number of occupied dwelling units in Panorama Hills was 6,949 with a population of 22,247. ▪ The community is planned for an estimated 8,219 housing units with a population capacity of 23,500 to 24,700. ▪ The community had an average annual population growth of 1,934 persons during the past three-year period. 	
Enrolment Profile	
<ul style="list-style-type: none"> ▪ As of the April 2012 Census, there were 1,312 public declared preschool aged children. ▪ As of September 30, 2012, there were 1,122 Kindergarten to Grade 4 students residing in Panorama Hills who attended CBE schools. 	
Site Planning and Transportation	
<ul style="list-style-type: none"> ▪ Panorama Hills K-3 students are currently accommodated in Panorama Hills School, with a capacity of 603 student spaces. There is one additional elementary school site in Panorama Hills. ▪ Captain Nichola Goddard School for Grades 4-9 opened in the 2012-2013 school year. ▪ Based upon projected student growth a second bus receiver school will be needed within two years. 	
Recommendation	
<ul style="list-style-type: none"> ▪ Construct a core elementary Grades K-4 school for 300 students complete with space to support a modular addition for 300 students in 12 units. The capacity of the school will be 600 student spaces. ▪ Panorama Hills School (K-Grade 3) is located in the southerly portion of Panorama Hills community. The site in the north will accommodate long-term enrolment growth for elementary students. ▪ The total project cost is budgeted at \$14 million. 	

5.0	2014-2017 SCHOOL CAPITAL PLAN
New Construction	
Priority C-3 Tuscany Elementary ⁽²⁾	
School Community Profile	
<p>Tuscany Community began development in 1995 and is situated in the northwest, south of Crowchild Trail and west of Stoney Trail.</p> <ul style="list-style-type: none"> As of the April 2012 Census, the total number of occupied dwelling units was 6,396 with a population of 19,013. The community is planned for an estimated 6,570 housing units with a population capacity of 19,100. The community has had an average annual population growth of 247 persons during the past three-year period. 	
Enrolment Profile	
<ul style="list-style-type: none"> As of the April 2012 Census, there were 1,402 public declared preschool-aged children in Tuscany. As of September 30, 2012, there were 1,199 Kindergarten to Grade 4 students residing in the Tuscany community that attended CBE schools. There is a strong demand for a second elementary school in Tuscany. 	
Site Planning and Transportation	
<ul style="list-style-type: none"> There is an elementary K-Grade 3 school located within the south half of Tuscany community, with a capacity of 612 student spaces. The north elementary site would be used for the second elementary school. Twelve Mile Coulee School for Grades 4-9 opened in the 2012-2013 school year. Based upon projected student growth, a second bus receiver school will be needed within two years. 	
Recommendation	
<ul style="list-style-type: none"> Construct a core elementary K-Grade 4 school for 300 students complete with space to support a modular addition for 300 students in 12 units. The capacity of the school will be 600 student spaces. Tuscany School (K-Grade 3) is located in the southerly portion of Tuscany community. The site in the north will accommodate long-term enrolment growth for elementary students. The total project cost is budgeted at \$14 million. 	

5.0 2014-2017 SCHOOL CAPITAL PLAN

New Construction

Priority C-4 New Brighton/Copperfield Middle

School Community Profile

New Brighton Community began development in 2002 and is situated in the southwest, north of McIvor Boulevard SE, south of 130 Avenue SE and east of 52 Street SE.

- As of the April 2012 Census, the total number of occupied dwelling units was 2,927 with a population of 8,303. The community is planned for an estimated 4,282 housing units with a population capacity of 11,500 to 12,000.
- The community had an average annual population growth of 1,054 persons during the past three-year period.

Copperfield Community began development in 2002 and is located in the southwest, north of Marquis of Lorne TR SE and south of 130 Avenue SE.

- As of the April 2012 Census, the total number of occupied dwelling units was 2,765 with a population of 7,834. The community is planned for an estimated 5,202 housing units with a population capacity of 12,600 to 13,300.
- The community had an average annual population growth of 742 persons during the past three-year period.

Enrolment Profile

- As of September 30, 2012, there were 319 Kindergarten to Grade 4 students and 231 Grades 5-9 students residing in the New Brighton community who attended CBE schools.
- As of September 30, 2012, there were 284 Kindergarten to Grade 4 students and 232 Grades 5-9 students residing in the Copperfield community who attended CBE schools.

Scarlett and Henry Wise Wood High. The closest high school, Centennial High, is full and accommodates communities in the south. ▪ A 25 acre senior high school site is located in the Seton community near the new southeast hospital. A future city recreation centre is on the same site. 	
Enrolment Profile	
<ul style="list-style-type: none"> ▪ Area V is comprised of Sector 8 and 9 and has a utilization rate by residence of 101%. Sector 9, consisting of new communities has a utilization rate of 242% by residence. ▪ Centennial High School has a utilization rate by enrolment of 105% and cannot accommodate southeast communities. ▪ Lord Beaverbrook High School has a provincial capacity of 2,415 student spaces and a utilization rate by enrolment of 82%. Currently, five new and developing southeast communities are designated to this school. Auburn Bay and Mahogany cannot be accommodated in the long term and are directed to other high schools. ▪ Dr. E.P. Scarlett High School has a net capacity of 1760 student spaces for a utilization rate by enrolment of 99%. ▪ The five communities north of Highway 22X currently have 1,278 students attending CBE high schools for Grades 10 -12. These three communities south of Highway 22X currently have 289 students attending CBE high schools for Grades 10 -12. Henry Wise Wood High School is a long bus ride for Mahogany students. 	
Site Planning and Transportation	
Communities in the southeast are bussed to three different Area V schools.	
Recommendation	
<ul style="list-style-type: none"> ▪ Construct a senior high school for 1,800 Grades 10-12 students. ▪ The total project cost is budgeted at \$50 million, including the CTS space allowance and an allowance for CTS equipment in the amount of \$400,000. 	

5.0	2014-2017 SCHOOL CAPITAL PLAN
New Construction	
Priority C-12 Saddle Ridge Elementary ⁽²⁾	
School Community Profile	
<p>Saddle Ridge Community began development in 2000 and is situated in the northeast sector of the city immediately west of 68 Street NE and north of the Martindale community.</p> <ul style="list-style-type: none"> ▪ As of the April 2012 Census, the total number of occupied dwelling units was 3,585 with a population of 14,372. ▪ The community is planned for an estimated 8,253 housing units with a population capacity of 23,600 to 24,900. ▪ The community has had an average annual population growth of 706 persons during the past three-year period. 	
Enrolment Profile	
<ul style="list-style-type: none"> ▪ As of the April 2012 Census, there were 896 public declared preschool-aged children in Saddle Ridge. ▪ As of September 30, 2012, there were 724 Kindergarten to Grade 4 students residing in the Saddle Ridge community that attended CBE schools. There will be a strong demand over time for a second elementary school in Saddle Ridge as the community builds out. 	
Site Planning and Transportation	
<ul style="list-style-type: none"> ▪ There is an elementary K-3 school located within the central portion of Saddle Ridge community, with a capacity of 550 student spaces. Grade 4's cannot be accommodated and are bused to Colonel Macleod School with the Grade 5 - 9's. ▪ There is a middle school site in Saddle Ridge in the west part of the community. The east elementary site would be used for the second elementary school. ▪ Based upon projected student growth a second bus receiver school will be needed within two years. 	
Recommendation	
<ul style="list-style-type: none"> ▪ Construct a core elementary K-4 school for 300 students complete with space to support a modular addition for 300 students in 12 units. The capacity of the school will be 600 student spaces. ▪ The east elementary site will accommodate long-term enrolment growth for elementary students. ▪ The total project cost is budgeted at \$14 million.

Major Modernizations	
Priority M-1 Aboriginal Family Community School - Harold W. Riley	
Current and Future Student Accommodation Plan	
<p>Calgary's Aboriginal population is the third largest among Canadian metropolitan centres. CBE's Administrative Regulation 3079, Aboriginal Education, outlines the importance of improving the success rate of Aboriginal students and increasing the understanding and acceptance of Aboriginal cultures of all students. Alberta's Commission on Learning specifically recommended that parents be able to access a variety of educational settings for Aboriginal students including separate settings where both parents and students may learn in a facility dedicated to the Aboriginal culture and history.</p> <p>The future student accommodation plan is to provide a facility that meets the needs of students, family and community programming. As Colonel Walker School also accommodates the Regular Program for elementary students residing in the community of Inglewood, there is limited space to expand the Piitoayis Family School at Colonel Walker School that includes the vision for students, families, and community needs.</p> <p>The Piitoayis Family School is located within Colonel Walker School in the community of Inglewood. The school has shared the building with Colonel Walker School since 2005.</p> <p>The CBE is committed to improving results for our Aboriginal learners. The next step in this important work is the development of an Early Learning Centre for Aboriginal families. The centre would be a place of holistic support and healing for families while providing high quality early learning and intervention for young children. The centre would include the following components:</p> <ul style="list-style-type: none"> ▪ Preschool programs for children from two years six months to four years six months ▪ Full day Kindergarten ▪ Child care for before and after school hours ▪ Room for parent/community programs <ul style="list-style-type: none"> ▪ Space for commercial food preparation ▪ Space for community gatherings ▪ Mental health services ▪ Parenting support ▪ Cultural opportunities – language, dance, etc. <p>This project is a collaboration involving many community partners and will evolve over a period of time. For the 2014–2015 school year, our goal is to open the preschool and kindergarten component of the program.</p>

Major Modernizations	
Priority M-1 Aboriginal Family Community School - Harold W. Riley	
Facility Description	
<p>The original single storey building, complete with gymnasium, was constructed in 1972. There have been no significant renovations or additions to the building since construction. Overall construction comprises a foundation of footings and grade beams complete with concrete slab on grade. The superstructure, both exterior and interior, is masonry supporting open web steel joists with steel roof decking.</p> <p>The exterior is clad in masonry 'big-block' brick complete with exposed aggregate stucco finish. Windows are typically insulated glazing units (IGUs), aluminum and metal framed. Some have metal security mesh on the exterior. Exterior doors are wood or insulated hollow metal. The roof assembly is two-ply modified bitumen membrane with granular surfaced cap sheet and flashing.</p> <p>Roof assembly was last replaced in 1997. Parapet flashing and roof divider have factory-finished metal coping and flashing. The total area of the main building is 2,813 m² consisting of 16 classrooms. The classrooms range in size and have access to natural light.</p> <p>In 2007, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation consisted of the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (repair cladding; there is no barrier-free accessibility entrance, etc.) ▪ Interiors: require upgrading (fire doors and electrical door holders, replace door knobs with barrier-free handles, barrier-free washroom, etc.) ▪ Mechanical: requires upgrades (exhaust fans, gas meter ventilation, auto-flush urinals and water closets, barrier-free faucets) ▪ Electrical: systems require upgrading (fluorescent lights and monitors, exit signs, exterior lighting, etc.) 	
Modernization	
<p>A modernization is required due to the age and condition of the building components. Modernization of instructional spaces and a building extension is required to enhance the learning environment for the Aboriginal program. The project will include upgrading the building envelope and mechanical/electrical equipment. The scope will also include replacement of worn architectural finishes and fixtures, program space renovations including a library to learning commons conversion to bring the school into alignment with 21st century learning. Additional project items include building and fire code upgrades, hazardous material abatement, barrier-free accessibility, and safety/security concerns. The total project cost is estimated to be \$16 million.</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-2 Jack James – CTS Program	
<p>A planned CBE strategy to address the new Career and Technology Studies curriculum requires approval of modernization projects to be undertaken in high schools in each of Areas I, II, III and V. These schools require priority placements for major modernization projects in order to deliver Career and Technology Studies courses and programs to students at exploratory, specialized and credentialed levels.</p> <p>The Lord Shaughnessy High School modernization in Area IV is the first modernization project undertaken to prototype Career and Technology learning environments.</p> <p>Career and Technology Courses are designed to engage students in learning in authentic, relevant and personalized learning environments. Through this approach to learning, students transition from their high school experience more successfully into the world of work or into post-secondary education. Creating these personalized pathways through Career and Technology courses and programs allow students the opportunity to examine their career goals and expand their interests in future success.</p> <p>The Career and Technology Centres combine authentic and relevant learning opportunities with personalized education, where classroom theory can be move into performance related activities.</p>	
Facility Description	
<p>The original two storey building complete with gymnasium was constructed in 1980. There have been several renovations throughout the building since construction. Overall construction comprises a foundation of piles and grade beams complete with concrete slab on grade. The superstructure is a combination of reinforced concrete columns supporting suspended concrete floor and roof structure. The (current) CTS section of the facility has a roof structure of steel girders and beams.</p> <p>The mezzanine area is comprised of concrete flooring on top of steel decking on web steel joists on steel columns. It has been noted that the second storey section of the building (not CTS) has post-tensioned reinforced slab. The exterior is clad in brick complete with metal siding accents. Windows are insulated and aluminum and metal framed. Exterior doors are both wood and metal painted. Roof is membrane on styrene insulation on steel decking complete with crushed aggregate finish.</p> <p>The total area of the main building is 10,118 m² consisting of 37 classrooms. The classrooms range in size and have access to natural light.</p> <p>In 2007, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (main building roof structure shows wear – was scheduled to be repaired in 2011; joint sealers and mortar joints need attention; and post-tension floor sections require inspection, etc.) 	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-2 Jack James – CTS Program	
Facility Description (cont'd)	
<ul style="list-style-type: none"> ▪ Interiors: require upgrading (repair fire protection on steel columns, fire stops, etc.) ▪ Mechanical: requires upgrades (auto-urinal flush and water closets) ▪ Electrical: systems require upgrading (additional circuits required for CTS, computer, and LAN spaces, fluorescent lights and monitors) 	
Modernization	
<p>Due to the age and condition of the building components, a modernization will improve functionality, security, safety and will upgrade building infrastructure. There is also a need to modernize instructional spaces in order to enhance the learning environment. This modernization focuses on upgrading CTS space throughout the school, and includes partial upgrading of the building envelope and mechanical/electrical systems. The scope will also include replacement of worn architectural finishes and fixtures, program space renovations, including a library to learning commons conversion to bring the school into alignment with 21st century learning. Additional project items include building and fire code upgrades, hazardous material abatement, and addressing barrier-free accessibility. The total project cost is estimated to be \$12 million.</p>

Major Modernizations	
Priority M-3 Bowness High – CTS Program	
<p>A planned CBE strategy to address the new Career and Technology Studies curriculum requires approval of modernization projects to be undertaken in high schools in each of Areas I, II, III and V. These schools require priority placements for major modernization projects in order to deliver Career and Technology Studies courses and programs to students at exploratory, specialized and credentialed levels.</p> <p>The Lord Shaughnessy High School modernization in Area IV is the first modernization project undertaken to prototype Career and Technology learning environments.</p> <p>Career and Technology Courses are designed to engage students in learning in authentic, relevant and personalized learning environments. Through this approach to learning, students transition from their high school experience more successfully into the world of work or into post-secondary education . Creating these personalized pathways through Career and Technology courses and programs allow students the opportunity to examine their career goals and expand their interests in future success.</p> <p>The Career and Technology Centres combine authentic and relevant learning opportunities with personalized education, where classroom theory can be move into performance related activities.</p>	
Facility Description	
<p>The original two-storey school was built in 1955 with a wood-frame structure and stucco exterior. Major additions were completed in 1959 and 1964 and minor additions were completed in 1972 and 1986. The additions were built in concrete and steel construction with masonry cladding. In 2003, a barrier-free renovation was undertaken.</p> <p>The total area of the building is 16,580 m² consisting of 57 classrooms. A number of classrooms are internal and do not have access to natural light. Major portions of the wood-frame facility are nearing the end of their useful life. The concrete structure is of concern and considerable work is required on the building envelope, as well as the interior.</p> <p>In 2010, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in marginal condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (many exterior and structural components are nearing the end of their life-cycle; structural components are showing signs of movement and stress) ▪ Interior: requires upgrading (some elements have been upgraded, i.e. ceiling tiles; other components are nearing life cycle end, i.e. doors) ▪ Mechanical: systems require upgrading (HVAC equipment, etc.) ▪ Electrical: systems require upgrading (lighting system, exit signs, etc.) 	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-3 Bowness High – CTS Program	
Modernization	
<p>The modernization will improve functionality, security, and safety and will upgrade building infrastructure. This modernization will focus on upgrading CTS space throughout the school. This will include partial mechanical and major electrical systems upgrades (power, interior lighting fixtures, and controls), as well as building envelope upgrades (roof and door). All finishes (flooring, ceilings) and worn fixtures (operable wall between gym and stage) will be replaced. Washroom upgrades and millwork replacement are part of the work.</p> <p>Teaching space upgrades include: adding walls and doors to address acoustic problems, adding electric blinds and acoustic panels, and a library to learning commons conversion. This modernization will address barrier-free issues (handicap washroom) and security concerns (front entry administration renovation to control access to the school). Replacing gravel with asphalt and adding an exterior stair for safe access downhill will address the safety issues. Replacement of on-site open garbage containers with closed containers is required. An estimate cost of the modernization is \$20 million.</p>	

6.0 2013-2016 SCHOOL CAPITAL PLAN**Major Modernizations****Priority M-4 Kingsland Centre - Chinook Learning Services****Chinook Learning Services Mandate**

Chinook Learning Services provides older adolescent and adult high school academic upgrading, Adult ESL, and Continuing Education programs for the CBE. Chinook Learning Services provides high school upgrading to over 10,000 part-time students over the course of a year, including summer school. It serves students from all Areas of the city and from the greater Calgary region. The present demographics of Chinook Learning Services students (Fall 2012) indicate that student population is split evenly among all four quadrants of the city.

Chinook Learning Services			
Program	Annual	Daily	Location
High School Credit	10,000 students (13,500 registrations)	1,600	Viscount Bennett Centre
ESL	300	125	Tuxedo Park School
LINC*	540	360	4 sites: Viscount Bennett Centre, Tuxedo Park School, Calgary Achievement Centre for Youth, Christian City Church
Continuing Education	7,000	Varies	10 school sites across Calgary

*Language Instruction for Newcomers to Canada

The changes to the School Act in October 2012 extended funding to 21 years of age. This change will potentially increase the population at Chinook Learning Services as there will be an opportunity for many more students to successfully complete their high school education and transition into post-secondary programs and the work force. In addition, the present Alberta Education initiatives support the trend among some students to take longer than the average 12 years to complete to the end of high school.

The population of Chinook Learning Services is diverse. Although some students attend Chinook Learning Services to upgrade academic courses for University entrance, many students struggle with learning issues which may or may not have been diagnosed at an earlier age.

Chinook Learning Services (CLS) has demonstrated a steady increase in enrolment over the past few years. This trend is expected to continue with the changes to the School Act and with the growing population of Calgary. CLS operates year round, offering both evening and daytime courses. During the summer, Chinook Learning Services offers Summer School. The enrolment is approximately 4500 students (primarily high school age). In addition to Viscount Bennett Centre campus, four regular high schools act as satellites during July to provide adequate facilities for students living in different quadrants of the city. Chinook Learning Services also runs an International Summer School for students from Taiwan. This program is

6.0	2013-2016 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-4 Kingsland Centre - Chinook Learning Services	
Chinook Learning Services Mandate (cont'd)	
<p>run out of a high school in the SW part of the city. The demand for summer school programs has increased over the past several years.</p> <p>Chinook Learning Services is the largest centre in Alberta for diploma examination testing centre and for generating CEU's. Presently students at Chinook Learning Services take an average of one to two courses a semester. Presently courses are timetabled in three hour sessions twice a week for each semester. Based on learner need, there is a consideration to adjust the timetable to provide a more suitable program.</p> <p>Chinook Learning Services is a significant contributor to the CBE's high school strategy successfully supporting many students to complete high school and transition to post-secondary.</p>	
Current Status	
<p>Chinook Learning Services needs to vacate its main campus at Viscount Bennett Centre as the 58-year-old building is in need of major renovations and upgrading. Alberta Infrastructure conducted a detailed architectural and engineering study in 2000 and determined that \$23 million was required to renovate the existing building to meet educational needs and building code requirements. The conclusion of Architectural and Engineering Services was that it was uneconomical to restore the building. The CBE plans to sell the Viscount Bennett site.</p> <p>As of December 2012, the CBE officially obtained the property of the Booth Centre located in the East Village in the downtown. Conceptual plans for the renovation of this building have been drawn up in order to work through the City of Calgary's approval process. A steering committee oversees development of this project. As the East Village location will only accommodate a portion of the Academic portion of the student population, it is clear that more space will be required at future sites.</p> <p>The CBE had \$10.5 million approved toward the Chinook Learning Services capital project from last year's School Capital Plan 2012-2015. The CBE has been in the process of planning for the move of Chinook Learning Services from Viscount Bennett Centre. The CBE vision for Chinook Learning Services is a central campus in or in close proximity to the Downtown with two other locations in the city of Kingsland Centre (M-4) and James Fowler High School (M-5).</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-4 Kingsland Centre - Chinook Learning Services (cont'd)	
Facility Description	
<p>Kingsland School is a single storey facility with partial basement was completed in 1958. Overall construction comprises of a foundation of concrete slab floors on both foundational walls on strip footings and piles. The super-structure consists of load bearing masonry block walls throughout. The roof structure is constructed of open web-framed steel trusses and steel flange beams all supporting the above steel decking and roof membrane. The exterior is finished with brick, stucco and exposed cast-in-place concrete. Doors are typically wood, windows are double glazed and metal framed; both are painted.</p> <p>The total area of the main building is 4818.6 m² consisting of 22 classrooms. The classrooms range in size and have access to natural light.</p> <p>In 2007, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (refinish exterior finishes, caulking, replace SBS roof system) ▪ Mechanical: systems require life cycle upgrading (install sprinkler system, roof drains, hot water system, etc.) ▪ Electrical: systems require upgrading (starter motors, sub-distribution panels, fluorescent system upgrades, exit signs, etc.) 	
Modernization	
<p>A school modernization is required due to the age and condition of the Kingsland Centre building components, and the need to modernize instructional spaces in order to enhance the learning environment. This facility and site will be adapted to accommodate Chinook Learning Services (south location).</p> <p>The modernization will include partial upgrading of the building envelope, and mechanical/electrical equipment. The scope will also include replacement of worn architectural finishes and fixtures, program space renovations, including a library to learning commons conversion to bring the school into alignment with 21st century learning. Additional project items include building and fire code upgrades, hazardous material abatement and addressing barrier-free accessibility and safety/security concerns. The total project cost is estimated to be \$4.5 million.</p>

Current and Future Student Accommodation Plan	
<p>Altadore School is located in southwest Calgary in the community of Altadore which is in the inner city in Area IV. Altadore School currently accommodates the Regular program for Kindergarten to Grade 6 students living in Altadore which includes Garrison Woods.</p> <p>The long-term student accommodation plan for Altadore School is to accommodate students from Altadore (including Garrison Woods). Garrison Woods is part of the Canada Lands redevelopment of the old Canadian Forces Base (CFB). This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that enrolment will be at or near capacity.</p>	
Facility Description	
<p>The one-storey building was constructed in 1952 with a wood frame on a concrete foundation. The school was renovated in 2002 with new exterior cladding, windows, doors, skylights and roof. A barrier-free washroom was provided in 2002; however, the remainder of the school requires barrier-free renovations. The total area of the building is 2,737 m² consisting of 14 classrooms for instruction. Most of the classrooms are similar to current standards and have good natural light.</p> <p>In 2010, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made this recommendation:</p> <p>Mechanical: systems require upgrading (hot water tanks, boiler, ventilators, etc.)</p>	
Modernization	
<p>The modernization would upgrade the entire mechanical systems: replace hot water tanks, steam boilers, breeching, steam piping, controls, exhaust fans, radiation system, and unit ventilators. Electrical upgrades would consist of cabling and electrical wiring upgrades. The project would also upgrade building code deficiencies with full barrier-free accessibility, and a library to Learning Commons conversion. The total project cost is estimated to be \$9 million.</p>

Priority M-11 Senator Patrick Burns School	
Current and Future Student Accommodation Plan	
<p>Senator Patrick Burns School is located in northwest Calgary in the community of Collingwood, which is an established community.</p> <ul style="list-style-type: none"> ▪ Regular Program Senator Patrick Burns School currently accommodates the Regular program for Grades 7-9 students living in Banff Trail, Charleswood, Collingwood, and Capitol Hill (west of 14 Street). Senator Patrick Burns also accommodates the National Sport Academy. ▪ Spanish Bilingual Program Senator Patrick Burns School currently accommodates Grades 5-9 students for the Spanish Bilingual alternative program for students residing in Areas I to III. <p>The long-term student accommodation plan for Senator Patrick Burns School is to accommodate students in Regular and/or Alternative programs. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that enrolment will be at or near capacity.</p>	
Facility Description	
<p>The two-storey building was constructed in 1961 as a concrete, steel, and masonry structure. An addition in 1966 created an exterior courtyard between the original two U-shaped wings. A renovation in 1999 replaced linoleum and acoustic ceiling tile in five classrooms and the staff lounge. The total area of the building is 7,989 m² consisting of 32 classrooms for instruction. The classrooms are slightly smaller than the current standard and have moderate access to natural light.</p> <p>In 2011, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in overall acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrading (windows, doors, siding) ▪ Interior: requires upgrading (all components) ▪ Mechanical: systems require upgrading (ending lifecycle) ▪ Electrical: requires upgrading (exit signs, panels, transformer, etc.) 	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-11 Senator Patrick Burns School	
Modernization	
<p>Since the evaluation, it has been found that the original curtain wall is in poor condition and the majority of original finishes are showing signs of deterioration. Different preservation projects have since been undertaken and completed. Such projects have included upgrading lockers and the communication systems.</p> <p>The facility requires renovations to such areas as: the visual communication lab, the fashion lab, the music room, CTS spaces, and a library to learning commons conversion. Wiring and data enhancements are required as part of improvements to the electrical systems. Renovations would also be carried out to the mechanical systems. Finishes and millwork throughout the school are aging and in need of replacement. The school would be upgraded to be barrier-free by providing an elevator and related upgrades such as barrier-free accessible washrooms. The original curtain wall exterior cladding is deteriorated and should be replaced. The roof must be replaced. Some site work is also required. The cost estimate for this modernization is \$13 million.</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-12 A.E. Cross School	
Current and Future Student Accommodation Plan	
<p>A.E. Cross School is located in southwest Calgary in the community of Glenbrook, which is an established community.</p> <ul style="list-style-type: none"> ▪ Regular Program A.E. Cross School currently accommodates the Regular program for Grades 7-9 students living in Glenbrook, Glamorgan, Killarney, Glengarry, Lincoln Park, Richmond, CFB Lincoln Park/Garrison Green, and Rutland Park. Students residing in Signal Hill and Springbank Hill are also currently designated to A.E. Cross School for Grades 7-9. ▪ System Classes A.E. Cross School accommodates Paced Learning and Learning and Literacy classes for Area IV students. <p>The long-term student accommodation plan for A.E. Cross School is to accommodate students from their home area and to continue to accommodate students residing in new and developing communities in southwest Calgary. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that enrolment will be at or near capacity. A.E. Cross School currently accommodates the Area IV office.</p>	
Facility Description	
<p>The original building was built in 1961 with a two-storey classroom wing added in 1966. The building has a masonry and steel construction, wood-roof deck with masonry and curtain wall exterior. A modernization took place in 1983. The gross building area is 9,064 m² consisting of 36 classrooms, with the majority of the classrooms being slightly smaller than current standards. The provincial capacity of A.E. Cross School has been set at 1,066 student spaces. The gym, library, and administration space are typical size for a school of this capacity. The ancillary spaces are quite large compared to classroom standards which would account for the higher capacity of the facility's rating.</p> <p>The structure is considered to be in good condition. Many of the classrooms have good natural lighting. The building exterior is finished with low maintenance materials; however, the wood portions of the exterior are in need of maintenance. Floors are generally in good condition with some needing repair.</p>

Major Modernizations	
Priority M-14 Woodman School	
Current and Future Student Accommodation Plan	
<p>Woodman School is located in southwest Calgary in the community of Haysboro, which is an established community. Woodman School currently accommodates Grades 7-9 students living in Haysboro, part of Southwood, Chinook Park, Eagle Ridge, Kelvin Grove and Kingsland. Woodman School is the bus receiver school for Grades 7-9 students living in Woodlands, Woodbine and Walden. Woodman School is also the bus receiver school for Grades 5-9 students living in Evergreen.</p> <p>The long-term student accommodation plan for Woodman School is to accommodate students in the Regular program.</p>	
Facility Description	
<p>The original building was constructed in 1960 with wood framing and a stucco and masonry exterior. An addition was completed in 1968 with a masonry and steel construction exterior and is capable of a longer life than other major components. A renovation was completed in 2003, including a barrier-free upgrade consisting of an elevator, handicap lift, and washroom renovation. The facility is in reasonable condition for its age; however, finishes and furnishings have become dated and are showing wear. Windows have been replaced and the roof was replaced approximately four years ago.</p> <p>The gross building area is 8,744 m² consisting of 34 classrooms. Most of the teaching spaces are sized to current standards and have good natural light. The gym, by Alberta Education standards, is small for a junior high school of this capacity. The school has an efficient layout, but allows little real flexibility in the use of the building. Internal reconfiguration of spaces would be required to better address the needs of junior high students.</p> <p>In 2008, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in good condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (barrier-free accessibility ramp features, replacement of windows and doors, painting, etc.) ▪ Interior: requires lifecycle upgrading (doors, hardware, shower stalls, etc.) ▪ Mechanical: systems require upgrading (most mechanical systems are past lifecycle) ▪ Electrical: systems require upgrading (many components are past lifecycle, but still functional)

Students residing in Woodlands and Woodbine currently have the option to attend either Henry Wise Wood High School or Dr. E.P. Scarlett High School. The new and developing community of Mahogany is also designated to Henry Wise Wood High School for Grades 10-12 students. Henry Wise Wood High School currently accommodates the International Baccalaureate (IB) for senior high students residing in Area V.</p> <p>▪ System Classes</p> <p>Henry Wise Wood High School currently accommodates Gifted and Talented, Literacy English and Academic Development, Paced Learning, and ACCESS classes.</p> <p>▪ Traditional Learning Centre (TLC) Alternative Program</p> <p>Henry Wise Wood High School currently accommodates the Traditional Learning Centre alternative program for students residing in Area IV and Area V.</p> <p>The long-term student accommodation plan for Henry Wise Wood High School is to accommodate students residing in Areas IV and V for Regular and TLC programs. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that enrolment will be at or near capacity.</p> 	
Facility Description	
<p>The original building was constructed in 1961 with an open courtyard that was enclosed in 1964 to form a large library, a study and a lunchroom area. The original school structure sits on a combination of both pile and concrete wall foundations. The main floor is concrete slab on grade. The super-structure is constructed of cast-in-place concrete columns, floor, and roof slabs. There are single-storey portions of the super-structure comprised of steel joists and metal decking. The courtyard infill is comprised of steel joists and metal decking. The super-structure is capable of a significantly longer life than the other major components. Minor renovations were made to the building in 1999, upgrading two CTS areas, some science labs, and the home economics area, as well as the drama change rooms. Handicap accessibility in the building has also been addressed.</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-16 Henry Wise Wood High School	
Facility Description	
<p>In 2005, upgrades were made to the ceilings in second and third floor classrooms. The total floor area is 15,804 m² and the school has 74 classrooms. The provincial capacity of the school is 1,946 student spaces. The teaching spaces are different sizes and have good natural light.</p> <p>In 2011, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable-to-marginal condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (curtain walls require replacement, painting, etc.) ▪ Interior: requires upgrading (barrier-free accessibility features, paint, etc.) ▪ Mechanical: systems require upgrading (HVAC system (old), boilers, roof top vent systems, hot water system, etc.) ▪ Electrical: systems require upgrading (security systems, exit signs, receptacles, fixtures in cafeteria, motor starters, main distribution switchgear in school, etc.) <p>The most pressing need identified was the inadequate performance and presentation space for large groups. Space large enough for presentations and medium-sized audiences (100 to 300 persons) is required.</p>	
Modernization	
<p>The scope of the modernization will include developing a multi-purpose presentation and exhibition space, as there is no space within the school where gatherings/meetings for more than 50 students can take place. The scope will include mechanical and electrical upgrades that will address thermal comfort, energy efficiency, provide additional power and data outlets, and building envelope upgrades. The scope will also include upgrading worn finishes and fixtures (e.g., paint, lockers), doors and hardware, replacement and washroom upgrades. Select program space renovation, hazardous material abatement, and building code and barrier-free accessibility upgrades will be part of the modernization. The project proposed will enhance the teaching environment. The total project cost is estimated to be \$20 million.</p>

Priority M-18 Robert Warren School	
Current and Future Student Accommodation Plan	
<p>Robert Warren School</p> <p>Robert Warren School is located in southwest Calgary in the community of Canyon Meadows, which is an established community in Area V.</p> <ul style="list-style-type: none"> ▪ Regular Program <p>Robert Warren School currently only accommodates Grade 9 students in the Regular program as a staged closure was implemented in September 2011. The staged closure allows students to finish their junior high program at Robert Warren School. Effective June 30, 2013, Robert Warren School will no longer accommodate students in the regular program.</p> ▪ Spanish Bilingual Program <p>Robert Warren School currently accommodates Grades 5-9 Area V students in the Spanish Bilingual program.</p> <p>The long-term student accommodation plan for Robert Warren School is to accommodate students in the Spanish Bilingual program. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that the school will operate at or near capacity.</p>	
Facility Description	
<p>The one-storey building was completed in 1974 with masonry and steel construction. The addition was built in 1991 with barrier-free access. The building was partially renovated in 1999. As of October 2008, four new relocatable units were located on the school site, replacing the previous five outdated units. The total area of the building is 4,711 m² consisting of 20 classrooms (including the four new relocatables) for instruction. The classrooms are smaller than the current standard and internal ones do not have access to natural light. The layout of the main office creates security concerns.</p> <p>In 2007, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Structural: replace caulking of exterior of building ▪ Exterior: incorporate barrier-free items where applicable (automatic door openers, etc.) ▪ Mechanical: upgrade pneumatic controls and extend sprinkler system ▪ Electrical: upgrade components (i.e., exit signs and sub-distribution panels) 	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-18 Robert Warren School	
Modernization	
<p>The school's modernization strategy was divided into two phases with the first phase being completed in 2009 for a total cost of \$1.4 million. The first phase addressed the removal of five obsolete portables, replacing them with four new relocatable units. This construction included a connecting corridor, complete with lockers and a barrier-free ramp-way into the new units. The administration area was improved, the library was expanded, and safety modifications were also incorporated.</p> <p>When the remaining funds become available, Phase II of the modernization will complete the rest of the overall upgrading of the school and its aging systems. Work will include a full upgrade of the electrical and mechanical systems (heating and cooling systems, electrical systems, all lighting and emergency lighting). All finishes (flooring, ceilings, and painting) will be upgraded or replaced. A library to learning commons conversion will be included. Envelope upgrades include roof and door repair and upgrades. Washroom and change room upgrades as well as locker replacements are also part of the modernization. The project costs of Phase II are projected at \$5 million.</p>

Riley School is the designated school for junior high students for the German bilingual program residing in the CBE boundary. This program will close as of June 30, 2013. ▪ Traditional Learning Centre (TLC) Alternative Program Thomas B. Riley School and Brentwood School are the designated schools for the Traditional Learning Centre alternative program for Kindergarten to Grade 8 students residing in Area I. Brentwood School accommodates K-4 students and Grades 5-8 students are accommodated at Thomas B. Riley School. <p>The long-term student accommodation plan for Thomas B. Riley School is to accommodate students residing in the northwest quadrant of Calgary for Regular and Alternative programs. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that enrolment will be at or near capacity.</p>	
Facility Description	
<p>The facility is a split two-storey building comprised of load-bearing masonry and steel and was originally constructed in 1967. Both a modernization and an addition to the school were completed in 1985. The modernization upgraded the industrial arts shop, administration, library, and second floor ancillary rooms. The total area of the building is 6,188 m² consisting of 22 classrooms for instruction. Most of the classrooms are smaller than the current standard (80 m²) with good natural light.</p> <p>In 2011, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition.</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-20 Thomas B. Riley School	
Facility Description	
<p>The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Interior: spaces require upgrading (i.e., wood flooring, repainting of concrete flooring, etc.); Interior fire-stopping requires life cycle repairs ▪ Mechanical: many components require life cycle upgrading and repairs (i.e., replace lab sinks, etc.) ▪ Electrical: systems are aging and require lifecycle upgrading and recertification of components. 	
Modernization	
<p>A school modernization is required due to the age and condition of the building components, and the need to modernize instructional spaces in order to enhance the learning environment. The modernization will include upgrading the building envelope, mechanical and electrical equipment. The scope will also include replacement of worn architectural elements (finishes and fixtures), program space renovations, such as: Career and Technology Studies spaces, library to learning commons conversion, and performing arts areas. These modernizations will bring the school into alignment with 21st century learning. Additional project items include building code upgrades, hazardous material abatement and addressing barrier-free accessibility and safety/security concerns. The total project cost is estimated to be \$11 million.</p>

Priority M-21 Fairview School	
Current and Future Student Accommodation Plan	
<p>Fairview School is located in southeast Calgary in the community of Fairview, which is an established community in Area V.</p> <ul style="list-style-type: none"> ▪ Traditional Learning Centre (TLC) The Traditional Learning Centre is an alternative program committed to providing excellent academic program and character education to students who are at or above grade level. Fairview School currently accommodates Grades 5-8 students who live in Area V. ▪ French Immersion Program Fairview School currently accommodates Grades 5-9 students for early French Immersion. French Immersion students living in Area V east of Macleod Trail are designated to Fairview School for French Immersion. <p>The long-term student accommodation plan for Fairview School is to accommodate students in alternative programs. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that the school will operate near capacity.</p>	
Facility Description	
<p>The original two storey school building, with multi-levels and partial basement, was completed in 1961. There were two additions constructed in 1967.</p> <p>Its construction comprises concrete grade beams and spread footings, slab on grade, and concrete foundation walls. The super-structure is constructed of steel columns with concrete infill and concrete and masonry block load bearing walls. The roof structure is wood decking on steel joists. The exterior includes masonry brick, stucco, and insulated metal and glazed curtain walls.</p> <p>The total area of the main building is 9,599 m² consisting of 39 classrooms. The classrooms range in size and have access to natural light.</p> <p>In 2009, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Mechanical: upgrade furnaces and fans ▪ Electrical: upgrade old components (boards, lighting, duplexes, etc.)

Priority M-22 Colonel Irvine School	
Current and Future Student Accommodation Plan	
<p>Colonel Irvine School</p> <p>Colonel Irvine School is located in northeast Calgary in the community of Highwood, which is an established community in Area II.</p> <ul style="list-style-type: none"> ▪ Regular Program Colonel Irvine School currently accommodates Grades 7-9 students living in North Haven, Highwood, Cambrian Heights, Rosemont and Thorncliffe (partial). Colonel Irvine School is the bus receiver school for Grades 7-9 students living in Harvest Hills and Country Hills. ▪ System Classes Colonel Irvine School currently accommodates PLP (Paced Learning Program) and TASC (Training in Attitude, Social Skills and Communication) classes. ▪ Traditional Learning Centre (TLC) Colonel Irvine School has been identified as a new Traditional Learning Centre for students residing in Area II effective for the 2013-2014 school year. Colonel Irvine School will accommodate Grades 5-8 students. The Traditional Learning Centre is an alternative program committed to providing excellent academic program and character education to students who are at or above grade level. ▪ Chinese (Mandarin) Bilingual Program Colonel Irvine School became the location for Grades 7-9 Chinese (Mandarin) Bilingual programming for the 2012-2013 school year. Colonel Irvine accommodates students north of 17th Ave south. <p>The long-term student accommodation plan for Colonel Irvine School is to accommodate students in regular and/or alternative programs. This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that the school will operate at or near capacity.</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-22 Colonel Irvine School	
Facility Description	
<p>The original single storey facility, with partial basement, was completed in 1957. Two additions were added, first in 1960 (southeast corner) and then in 1968 (southwest corner). Due to the differing topography of the overall site, the north and south wings of the school vary in elevations creating a split level (stepped) structure. Both additions comprise two storeys. The 1968 addition (southwest corner) <i>caps</i> the original U-shaped structure.</p> <p>Due to its multi-levels and dates of construction, construction applications vary. Overall, construction comprises concrete slabs on grade with spread footings, concrete columns and foundation walls (basement and crawl spaces). Floor slabs are suspended on concrete piles or columns. Walls are primarily masonry block. Exterior finishes are brick and stucco. Roofs vary from steel trusses and steel decking to timber joists and wood decking (original structure). Windows are aluminum framed (three panes with hoper-type sections). Older building sections have metal framed windows.</p> <p>The total area of the main building is 8,714.7 m² consisting of 32 classrooms. The classrooms range in size and have access to natural light.</p> <p>In 2009, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: roof requires lifecycle replacement and additional roofing drains ▪ Interior: spaces require upgrading (new fire rated doors and barrier-free accessibility features, etc.) ▪ Mechanical: systems require life cycle upgrading (HVAC system, boilers, hot water system, etc.) ▪ Electrical: systems require upgrading (light fixtures, etc)

Priority M-24 Louis Riel School	
Current and Future Student Accommodation Plan	
<p>Louis Riel School is located in southwest Calgary in the community of Oakridge, which is an established suburb.</p> <ul style="list-style-type: none"> ▪ Regular Program and System Special Education – Kindergarten to Grade 9 Louis Riel School currently accommodates the regular program for Kindergarten-Grade 9 students living in Oakridge and Grades 7-9 students residing in Cedarbrae. Louis Riel School is also the designated school for students living on the Tsuu T'ina Nation. ▪ Science Program Louis Riel School accommodates the K-grade 9 Science alternative program for students residing in Area V. <p>This school has been identified as one that is required by the CBE to accommodate students into the future. It is anticipated that enrolment will be at or near capacity.</p>	
Facility Description	
<p>The original two storey building, complete with two gymnasiums, basement and performance space was constructed in 1970. An addition was added to the building in 1975 to provide space for an elementary program. There have been several modernizations to this building since its original construction, including the removal of eight modular units and a classroom renovation in 2010.</p> <p>Overall construction comprises a foundation of grade beams and footing pads. The superstructure consists of both exterior and interior masonry load bearing block complete with cast-in-place reinforced concrete floors. The roof structure is comprised of steel decking and membrane on open webbed steel joists and wide flanged beams.</p> <p>The exterior is a combination red brick, horizontal painted metal siding, stucco, and painted stone. Windows are typically double paned fixed and operable glazed units in aluminium frames. Exterior doors are typical steel framed (with or without glazing), painted.</p> <p>The total area of the main building is 7630.8 m² consisting of 33 classrooms. The classrooms are smaller than standard size. There is a combination of perimeter classrooms which have access to natural light; other rooms are internal space.</p>	

6.0	2014-2017 SCHOOL CAPITAL PLAN
Major Modernizations	
Priority M-24 Louis Riel School	
Facility Description (cont'd)	
<p>In 2007, Alberta Infrastructure evaluated school facilities through RECAPP and rated the overall condition of the facility as being in acceptable condition. The evaluation made the following recommendations:</p> <ul style="list-style-type: none"> ▪ Exterior: requires upgrades (repair concrete stairs, re-roof areas as required, repair stucco finish) ▪ Interior: requires upgrades (implement barrier-free items such as bathroom, install elevator, auto door openers) ▪ Mechanical: requires upgrades (repair roof drains, replace original furnaces and cold air condenser) ▪ Electrical: systems require upgrading (upgrade lighting fixtures, replace exit light fixtures and battery packs, etc.) 	
Modernization	
<p>Due to the age and condition of the building components, a modernization will improve functionality, security, safety and will upgrade building infrastructure. There is a need to modernize instructional spaces in order to enhance the learning environment.</p> <p>This modernization will include upgrading of the building envelope, mechanical and electrical systems. It will also replace worn architectural finishes and fixtures. This includes a library to learning commons conversion, bringing the school into alignment with 21st century learning. Additional project items include building and fire code upgrades, hazardous material abatement and addressing barrier-free accessibility including an elevator. The total project cost is estimated to be \$15 million.</p>

The first eight priorities are placements based on priority program needs for the CBE. The remaining projects have been ranked on a priority basis. Key factors that are evaluated to determine priorities are:

- Role of the school and accommodation plans (30% weighting)
- Enrolment, utilization rates, and enrolment projections (25% weighting)
- Site features and location (5% weighting)
- Facility condition (20% weighting)
- Ability to upgrade the facility (20% weighting)
- The top 25 priorities are in the Three-Year School Capital Plan 2014-2017

Maximum points = 500

Cranston ⁽²⁾	274*	51*	906	nbr	yes
Evergreen ⁽²⁾	465*	80*	654	nbr	no
Legacy	0	0	0	nbr	no
Mahogany	103	51	418	40	no
Silverado	352	168	839	27	no
Walden	39	35	312	37	no

- Notes:
1. Preschool Census includes Public Declared Only. (Statistics from the City of Calgary "Number of Pre-School Children").
 2. School ⁽²⁾ = the community has a new school constructed or approved and can support a second K-4 school.
 3. Annual Population Growth information from The City of Calgary "2012 Civic Census".
 4. Median Travel Time – "nbr" no bus receiver for that community.
 5. Bus Receivers – community receives points if they have greater than one bus receiver school within two school years. (Busing and Travel Time information as per Transportation Services)

- * **Tuscany**⁽²⁾ – deducted 612 (current provincial capacity) from pre-school (1402-612=790) total & K-4 (1199-612=587) total, as it would be their second elementary.
Panorama⁽²⁾ – deducted 603 (current provincial capacity) from pre-school (1312-603=709) total & K-4 (1122-603=519) total, as it would be their second elementary.
Martindale⁽²⁾ – deducted 515 (current provincial capacity) from pre-school (845-515=330) total & K-4 (851-515=336) total, as it would be their second elementary.
Saddle Ridge⁽²⁾ – deducted 550 (current provincial capacity) from pre-school (896-550=346) total & K-4 (724-550=174) total, as it would be their second elementary.
Cranston⁽²⁾ – deducted 550 (current provincial capacity) from pre-school (824-550=274) total & K-4 (601-550=51) total, as it would be their second elementary.
Evergreen⁽²⁾ – deducted 550 (current provincial capacity) from pre-school (1015-550=465) total & K-4 (630-550=80) total, as it would be their second elementary.

2014-2017 Ranking for Capital Submission – K-4

Community	Community Growth Profile (points)			Busing and Travel Time (points)		
	2012 Pre-school Census (Public Declared)	Elementary (K-GR4) Enrolment	Annual Population Growth 3-Yr Average	Median Travel Time	Bus Receivers	Total Points
Area I						
Hamptons	10	20	0	0	0	30

- Notes:
1. 0 points in Community Growth Profile = 0 points in Busing, Safety and Travel Time.
 2. Preschool Census includes Public Declared Only. (Statistics from the City of Calgary "Number of Pre-School Children".
 3. Communities that have a new school constructed or approved and can only support one K-4 school are not ranked.
 4. School ⁽²⁾ = the community has a new school constructed or approved and can support a second K-4 school.
For communities that already have an elementary school, their current actual capacity is deducted from their Pre-School and K-4 enrolments.
 5. Bus Receivers – community receives points if they have greater than one bus receiver school within two school years.

Median Travel Time to Bus Receiver	
15-19 minutes	5 points
20-24 minutes	10 points
25-29 minutes	15 points
30-34 minutes	20 points
35-39 minutes	25 points
≥40 minutes	30 points
Bus Receiver - Middle	
Greater than one bus receiver school required within two school years (no phase-outs)	10 points

CBE SYSTEM UTILIZATION – (2012 – 2022)
NO NEW SCHOOL ANNOUNCEMENTS

Year	New Capacity	CBE Capacity	Students	% Utilization
2012		129,724	103,664	79.9%
2013	1,500	131,224	106,832	81.4%
2014		131,224	109,960	83.8%
2015		131,224	112,891	86.0%
2016	1,800	133,024	114,956	86.4%
2017	3,300	136,324	117,203	86.0%
2018	-	136,324	119,264	87.5%
2019	-	136,324	121,621	89.2%
2020	-	136,324	123,698	90.7%
2021	-	136,324	125,251	91.9%
2022	-	136,324	126,681	92.9%

CBE SYSTEM UTILIZATION – (2012 – 2022) BEST CASE SCENARIO – 25 NEW SCHOOLS

Assumptions: 1) New schools approved in the following years:

- 2013 - 6 announcements
- Year 1 (2014) - 11 approvals
- Year 2 (2015) - 7 approvals
- Year 3 (2016) - 7 approvals
- 2017 - 2 approvals
- 2018 - 2 approvals

2) School completion times

- 3 years - Elementary (P3 process, design, construction, commissioning)
- 4 years - Middle (P3 process, design, construction, commissioning)
- 4 years - Senior High (P3 process, design, construction, commissioning)

Glossary of Terms and Definitions

CBE Definitions

Additions/Expansions:	Changes the gross area of building
CTS:	Career and Technology Studies
Modernization:	Supports modernization of a building
Provincial Capacity:	Gross square metres of a school divided by the area per student as per Alberta Education/Alberta Infrastructure's School Capital Manual Look-Up Table
RECAPP:	Renewal Capital Asset Planning Process
School Community	Attendance Area Boundary

CBE Formulas

Utilization Rate	= $\frac{\text{Weighted enrolment [K@FTE + enrolment + (Special Ed. x 3)]}}{\text{Provincial capacity (student spaces)}}$
Weighted Enrolment	= (Total Kindergarten divided by 2 [K@FTE]) + Grades 1-12 enrolment + (Special Education at 3:1)

Alberta Education/Alberta Infrastructure School Capital Manual Definitions

Area Capacity and Utilization Report	A report from Infrastructure that provides total capacity and utilization rates for a jurisdiction and its school facilities.
Barrier-Free	The <i>Alberta Building Code</i> defines the requirements to ensure that a school facility can accommodate people with special needs.
Capacity	The capacity of a new school and the method by which it is established as approved by Infrastructure. Records of capacity for all Alberta schools are maintained by Infrastructure and reflect the capacity established at the time of construction, minus any exclusions or exemptions subsequently approved by Infrastructure.
Capital Funding	Funding provided to school jurisdictions for school building projects in accordance with Education's approved budget schedule.
Code Requirements	The minimum requirements for construction defined by the <i>Alberta Building Code</i> and those standards referenced in the <i>Code</i> .
Core School	A school building that is constructed with a permanent core and can be expanded or contracted by the addition or removal of modular classrooms.
Facilities Plan	A general or broad plan for facilities and facility development within a school jurisdiction.

Facility Evaluation	Assessment of facility characteristics, which includes site, architectural and engineering components, maintenance planning, safety, space adequacy and environment protection, to determine the ability of the building to accommodate current and future needs.
Full-time Equivalent Occupancy	Is used as a measurement of space utilization. Enrolment is calculated on the number of student spaces occupied throughout the school day. Part time student use is expressed in terms of full-time equivalent students (FTEs).
Furniture & Equipment	Includes basic furnishings such as desks, seating, storage cabinets, tables and fixtures that are normally provided under a contract separate from the general construction contract.
Infrastructure Maintenance and Renewal (IMR) program	Provides funding to (a) replace building and site components which have failed and pose health and safety problems for students and staff, (b) extend the useful life of school facilities and sites and (c) maintain the quality of the school environment.
Instructional Area	Those areas of a school building that are designated for purposes of instruction, examinations and other student activities where direct or indirect student-teacher interaction is maintained or scheduled. Also included are storage areas considered directly related to various instructional areas (i.e. gym storage, drama storage and science preparation areas).
Inventory of Space	A listing of a school jurisdiction's owned or leased facilities, which include facility area and usage.
Life Cycle Costing	Process that examines all costs associated with a facility project for the extent of its lifetime.
Modernization Project	The restoration of an entire or a portion of a school facility to improve its functional adequacy and suitability for present and future educational programs.
Modular Classroom	Prototypical portable classroom units built at a central location and transported to schools across Alberta. These units are based on specifications that ensure significantly improved heating and ventilation, soundproofing, resistance to mould, ease of serviceability and several other factors that differentiate them from the older portables that are also part of schools across the province. The Government of Alberta's goal is to eventually replace all the older portables with the prototypical Modular Classrooms.
New Capacity	In the event that a new construction project adjusts the capacity rating, a new capacity will be incorporated to reconcile the school jurisdiction's total capacity one year after the date of Ministerial approval of the tender or alternate to tender scheme of construction.
Right-Sizing	Reduction in capacity of an existing school to provide a more efficient use of the facility due to declining enrolments.
School Building Project	Means (i) the purchase, erection, relocation, renovation, furnishing or equipping of, (ii) making of structural changes in, (iii) the addition to or extension of a school building, or (iv) the building of access roads or site preparation for a school building.

Site Development

Provision of utility services, access, location of buildings, playfields and landscaping.

Utilization Ratio

The ratio determined by dividing a jurisdiction's total FTE student enrolment by its net capacity.
