Q1: Demographic Information

Residential District	West Springs
Number of children	2
Grade of child(ren)	[Redacted]

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The walk zone should border along 77th Street all the way to Bow Trail. [Redacted]
[Redacted] The walk for our child in winter would be too long in cold weather and unsafe for her to walk that distance alone. My husband and I work and would not be able to drive and pick her up from school. Bussing should be available for a distance that far away.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

CBE should be considering the distance the children are required to walk in all their school zone areas. Due to our weather and the consideration of safety for young children, it is not appropriate to have such long distances for children that young of age to be alone for long distances. Not all parents are able to drop off/pick up their children at the school if they work full time during school hours. Unfortunately, due to the amount of crime and potential abductions in our city, we need to ensure our children are safe going to and from school.

Residential District

Strathcona Park

Number of children

2

Grade of child(ren)

Q2: In which new school project(s) are you interested?

Aspen Woods/Strathcona Elementary - Dr. Roberta Bondar School

,

West Springs/Cougar Ridge Middle

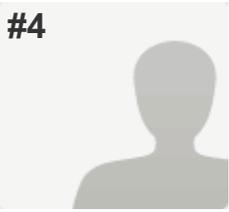

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Why doesn't West Springs/Cougar Ridge Middle School include Aspen or Strathcona communities? They are right next door to the school. Does that mean the kids who go to Aspen Elementary need to trek all the way across Sarcee to go to a Junior High, instead of right next door to them? That makes no sense.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Consider the logical, geographical placements of schools within communities, and how kids would realistically transition from elementary to junior high. Keeping kids closer to home and in their own community instead of having to bus them out is a better solution. West Springs Middle School should service the communities surrounding it, not just a select few.

Number of children	2
Grade of child(ren)	

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

With a projected capacity of only 500 in 2017 - the school capacity of 900 - why would Aspen West of 85 not be designated to this school? The distance these students need to travel to Vincent Massey is FAR greater than to WS Middle. Areas of Castle Keep and Aspen West would be within walking distance. In fact there are certainly parts of Coach Hill, Strathcona and Aspen that should be designated to WS Middle if utilization will be that low. KEEP THE CHILDREN OFF BOW TRAIL!

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone? *Respondent skipped this question*

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

We live in the Willows of Wentworth, which is one of the closest neighborhoods to the new school, yet it is almost on the edge of the walk zone while in other directions the walk zone extends significantly and disproportionately further. I am concerned that if the walk zone was reduced the smallest bit in the future that my house will be excluded. It seems that the school is not being built in the areas it really intends to serve. In my view the walk zone should be more proportionate and even to the areas surrounding the school.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Impending driving/parking nightmare! The schoolbus takes many cars off the road. I'm hoping the school zone speed limit location is extended to Wentworth Dr/9th ave. and a strong police presence is needed as drivers are in such a hurry to get to work and show blatant disregard for children's lives. I've witnessed it first hand and its atrocious!!

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Q1: Demographic Information

Residential District	West Springs
Number of children	2
Grade of child(ren)	

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

After reviewing the proposed walk zone for the West Springs/Cougar Ridge Middle School I am disappointed to learn that my child is in the walk zone and will not have the opportunity to be bused to school.

We live 3km from the newly constructed Middle School. As much as I believe that exercise is a must for all of us, I am concerned with the distance my child may need to walk in sub zero temperature and inclement weather. As both my wife and I work at start times that are earlier than school usually starts, this will put undue strain on our employment situation during periods when the weather is such that it is not feasible to walk the 3km to school.

My second issue is that the safety and security of our children is of primary importance to us. Although rare, there are greater opportunities for child/teen predators to approach my child over a 3 km distance. There have been reports of children being approached in our area over the past 10 years and I am just not comfortable with my child walking to her school.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

We live in location where there appears to be a great number of children that will either be going to the West Springs/Cougar Ridge Middle School, or will be attending in the next couple of years. I'm sure you have looked at the age demographics for the area, but if not, I would urge you to take a good look at this to help justify a change in transportation needs for our area that is currently outside of the busing area.

Thank you for your consideration of my rational for moving West Springs Place out of the "Walking Zone" and to prove bus transportation.

Q1: Demographic Information

Residential District	Wentworth
Number of children	2
Grade of child(ren)	[REDACTED]

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Why is the walk zone so large? Are kids living that far away from the school really expected to walk?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

My concern is that I purchased a house close to the school sites for the reason of my children going to school there. If the school fills up and the walk zone turns into a lottery, then there will be kids that aren't even within walking distance that may bump my kids from the school. Why wouldn't you make the walk zone a REAL walk zone (as in, walking distance) so that you don't end up with people who can see the school from their house not actually get in...?

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Will proof of distance be provided to families at the walk-zone perimeter? (Regular map software suggests a greater than 2.4 walking distance).

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Walk zones should only include side-walked, well-lit and well-maintained (snow/ice cleared in winter months) walkways for safety reasons.

Given the 900 estimated students expected to enrol, most of whom fall within the walk zone, will adequate bike racks be available for secure bicycle storage?

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

This is a very large zone with not overly good traffic lights crossing old banff coach road and NO pedestrian crossing...has a traffic count been considered prior to establishing this walk zone. Have any of the powers that be who decide these walk zones actually walked it??

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

There is only one set of traffic lights on Old Banff coach road coming from Cougar Ridge into west springs the other is a very dangerous 2 way stop neither have a cross walk for potentially hundreds of children to cross!! This is very dangerous and that is only the first section! There are other sections on the walk route where it is considered a high collision area.

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Is the southern boundary for West Springs/Cougar Ridge Middle School fixed? Moving it down to 17th Ave would allow students to avoid a long bus trip to Vincent Massey School. In fact, many students (including ours) could simply walk to the school.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

We feel that one thing to consider might be to have a larger walk zone knowing that in the future as new schools are added, this walk zone could be shrunk back again.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Please ensure you can sustain and accept all the children from within these boundaries without any lotteries for at least 7 years. The CBE ought to know about all the children that will need to attend this school going this far forward - after that if things need to change that's understandable, but for the next seven years there shouldn't be any HUGE surprises to the expected attendance forecasts, I think. If you don't think you can sustain this boundary - make it smaller already.

Q1: Demographic Information

Residential District	West Springs IV
Number of children	1
Grade of child(ren)	█

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The walk zone comprises virtually the entire area eligible to attend the school. Currently the walk zone for West Springs is South of Old Banff Coach Road and North of Bow Trail and it is much more reasonable. No young child should be walking to that school from Cougar Ridge (north of Old Banff Coach Road). Further, having child in a house south of Old Banff Coach Road bus to another school if there are capacity issues when they are blocks from the school is a misuse of funds. Further, those who chose to purchase homes within the current walk zone are now at a disadvantage.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Ability for a child / safety associated with a young child walking to the school. The school is in the same location as West Springs but the walk zone has been expanded relative to the current walk zone. There should be a bus for children in Cougar Ridge.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

We live in Wentworth. Currently our daughter's French middle school is Bishop Pinkham in Lakeview. She rides the bus for one full hour to get from Wentworth to Bishop Pinkham and goes to school car sick most mornings. For this reason, we would like to have the new middle school include the French program for those on this end of the district, which is clearly to large. We would like to see the district divided into two so that it is smaller. There is already overcrowding at Bishop Pinkham and this is because the catchment area is far too big for the number of families who want their children in Canada's second official language. Please consider splitting the catchment area in two and making the new Wentworth school two languages. Thank you.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The traffic flow around the new school is a nightmare already with the current elementary school. The kids that live in this walk zone will NOT actually be walking, rather be driven, that's a fact for this community. The kids that now live in the walk zone for the elementary school get driven and the parking, drop off zone is crazy. How this is going to be managed with both schools is a ridiculous idea.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Traffic lights and pedestrian lights at the intersection of Old Banff Coach Road and 89th Street. The traffic has very poor visibility there and the speed of the vehicles coming in and off the hwy there is very fast for kids crossing from Cougar Ridge.

Q2: In which new school project(s) are you interested?

Auburn Bay Elementary,

West Springs/Cougar Ridge Middle

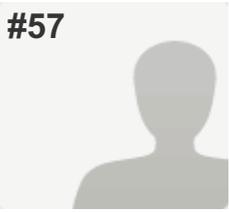

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The purposed walk zone is much too large to be effectively be considered a walk zone and should therefore be the school designated area. The walk zone should be south of OBCR, west of 77 street and north of Bow Trail. What students are really going to be walking from the outskirts (le Coulee way and west of 77 street) to West springs middle school? How are students going to be crossing OBCR and 85th street (pedestrian pedway overtop, tunnel) as these are both congested most of the time? is 85th going to have a traffic study preformed as this is a very busy road and how is the school going to impact traffic volumes and flows?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Q1: Demographic Information

Residential District	Cougar Ridge
Number of children	2
Grade of child(ren)	

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The main concern I have is the distance is ridiculous given that the only options are for crossing the intersection at Cougar Ridge Drive and Old Banff Coach road (by the Macs store) where motorists are constantly ignoring crossing pedestrians. Until this intersection either gets traffic lights, a four way stop or proper cross walk lights/signals, waling for my children is unacceptable as an option. It's a dangerous spot b/c driver are consistently vacant there. The other consideration is it is a LONG walk and what would you propose parents do during the winter months when the wind-chill reaches ridiculous levels. This walk zone map was clearly put together with the aim of not having to locate or spend any money for bus service. It's bad enough that Cougar Ridge residents have consistently received the "shaft" from the CBE from the beginning. The community was in place before Wentworth -West Springs and yet was left out of the elementary school. Now we finally get access to a school (and even our name is on it...wow!) and now Cougar Ridge student are expected to trudge over 2.5 km through awful traffic intersections with no cross walk controls (a sign doesn't stop motorists) in likely inclement weather. You need to re-evaluate this walk zone and provide access to bus service for this school. The way it's currently set up is unacceptable.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Keep in mind the large number of children in CR/West Springs and the fact that there will be a high need for a middle school. Please don't exclude Cougar Ridge again. We have been shafted too many times on too many things. We pay taxes too and yet have no schools.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

With that many kids in the walk zone what happens when the school does reach capacity? If everyone in the 2 communities is walk zone (and therefore category 1), how do you determine who gets in?!

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

As a suggestion and recommendation to resolve the above Problem I listed, I strongly believe that if a sibling attends the school, the upcoming sibling(s) should receive priority to attend that school too. CBE really needs to focus on keeping families together!! Thanks

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Respondent skipped this question

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

It is a really large walk zone. I like that Cougar Ridge will have a designated school on the hill but very concerned about the children crossing Old Banff Coach Road. I think a lot of children will end up being driven to school and with the proximity to the elementary the traffic issues will be immense

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Why would you not include the Coulee streets- there are only about 3 streets there and that is the end of the area that is connected to cougar ridge. Beside that is adult only housing.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Realizing we are on a ridge and there is really no other option, the walk zone needs to include coulee and cougar ridge. Also, you will need to consider the impact of the proposed projects by Truman for the land inside the OBCR-77 Steet-85 street and 9 avenue. They are planning to add several thousand people here

2

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

I am wondering why the area of Coulee Way and Cougar Ridge Landing were not included in the walking zone ie the far north east corner of Cougar Ridge. There are children living in this area that should also be included in this school catchment area as they are part of CR.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Although my children will not be attending this school, I am on the community association and have seen how leaving Cougar Ridge out of the West Spring schools catchment area has been detrimental to building a community. It will not be fair to the kids in the NE corner of CR if they have to be bussed down the hill to middle school, while their friends a block or 2 away can go to the local school. This is not good for our WSCR community and I hope you will sincerely reconsider the walking boundary.

Grade of child(ren)	[REDACTED]

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Absolutely, the current walk zone for Westsprings elementary, very few kids walk and the traffic is an absolute mess. I can imagine 900 more vehicles in the area. What is to guarantee that walk zone is a true walk zone?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Yes figure out a better traffic flow and make sure walk zone actually walks. Sick of walking through a field a smog and crazy drivers dropping off kids in the middle of the street

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Has anyone on the walk zone committee come to the areas involved and actually looked and or walked or checked the safety of some of the major intersections that our children would have to cross?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

FIRST AND FOREMOST OUR CHILDREN'S SAFETY!!! there are major intersections with no crossing lights at old banff coach road -huge safety issue. From the farthest point in CR/Ws it is over 2.5km is that really feasible and safe for the children to be walking in inclement weather, not other ride options?

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Crossing Old banff coach road at 89th street is VERY busy for those who come out of CR. It is not safe at all, there is a cross walk but traffic goes fast in that area! Also 9th ave could use a cross walk or something else to make it a little safer to cross at 89th street!

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Make those intersections safer and it should be ok!

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The walk zone appears to me as the eligible attendee zone, and not what kids would logically be expected to walk to the school. 85th Street and Old Banff Coach Road are both double lanes of traffic with many Burnco dump trucks barreling through from their gravel pit so I wouldn't kids in grade 5-7 having to cross that on foot.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Safety - how many lanes of traffic need to be crossed, how far the distance is to walk.

Residential District

Cougar Ridge

Number of children

2

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Why is it so unequal? We live right at the top of the map and my kids would have to cross mutiple large roads, some with just 4-way stops and Old Banff Coach Road. Extra crossings are needed and a full sidewalk on tbothe sides of 85th. They would be walking for over 30 minutes. What happens if you live south of Bow trail?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Will there be any bussing? [REDACTED]. They are looking at a 30 minute walk, tough in -25. We both work and cannot drive them to and from school. Traffic crossings are inadequate, horrendous intersection at 9th and 85th. Already busy and bad with one school and all the stores. How can you ensure the safety of our children?

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

How can you call a "walk zone" an area so large that you can be certain people at the putter edges will not be able to walk?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

To walk with a child/children from the far ends would take 30-45 minutes. And in many cases, the children would not be able to walk that far. Plus, MAJOR, poorly controlled roads will need to be crossed. Walk zone should be people who can truly walk to the school within 10-15 minutes.

If this walk zone remains, safety measures must be put in place at two major crossings on OBCR.

As well, there should be priority given to people truly in a walk zone - as in the people truly able to walk to the school.

Grade of child(ren)	██████

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

I am worried that the walk zone might lead to overcapacity and I would strongly recommend that siblings of children already in the middle school are given priority in a lottery scenario. Siblings cannot be split and therefore need to be made a priority.

Q4: Is there anything else we need to consider regarding walk zones as we move forward? *Respondent skipped this question*

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

It seems very large. I question if it should include anything east of 77th. The west springs elementary doesn't.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Is priority given to those in west springs elementary? If it goes to lottery due to the vast area included. It seems unfair that a child who attended 7 years at west springs elementary may not get into the middle school next door.

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

I appreciate that we are in the "walk zone" so that we have first priority if school acceptance ever comes to a lottery situation; however, it feels like the CBE is using scare tactics to have us accept this distance by calling it priority 1. "The walk zone will impact transportation services and lottery acceptance if future registrations exceed available space." Anyway, I don't feel the walk-zone guidelines are actually walkable. We are about 2 kms away from the school. Guess I will be driving them in the winter when they can't ride their bikes.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The zone is way too expansive. That is way too far for a grade 5 (10 yr old) to be expected to walk.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Yes, make it smaller and eliminate kids from crossing busy roads that have no pedestrian cross walks or lights (73rd St. and 77th St.)

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Even though this will not affect our family, this plan does not make sense to exclude Cougar Ridge Estates as the only enclave not included in the walk Zone for West Springs/Cougar Ridge Middle. This area looks like an isolated island for now, but will be joined up with Cougar Ridge Drive eventually. There are many homes with small children in this area. These children are living no further away than those is the eastern parts of West Springs east of 73rd street. Thank you for asking our opinion.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Please remember that Cougar Ridge drive will be extended eventually to join Cougar Ridge and Cougar Ridge Estates. A blinking light pedestrian crosswalk at Old Banff Coach Road and 73rd/Coulee Way will make the cross from Cougar Ridge Estates safer.

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Currently the crossings for Cougar Ridge across Old Banff Coach Road are not adequate for school aged children. What is being done on this? Can "overpass" walk ways be built?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Respondent skipped this question

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

What traffic improvements will be made to ensure a safe walk for children from Paskapoo to the middle school?
Crossing old Banff coach road is not very safe at any location.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Walking from the Paskapoo section of Cougar Ridge would take an adult at least half an hour, in good conditions, at a brisk pace. For a child, especially in winter, walking would absolutely not be an option. Not only are the intersections unsafe, the conditions would also be unsafe.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Winters in Calgary will see young children crossing 3 major intersections in snow suits and boots for a good chunk of their school year. Working parents do not have the luxury or wealth of west springs and aspen parents to have nannies drop off and pick up but should walk zones be made smaller, we risk not having a school for our kids to go to in lottery conditions. Lose lose options for cougar ridge once again.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Walk zones shouldn't automatically equate to priority registration given the schools will reach capacity. Safety, access, time for an average child attending the school to walk the distance in the snow should be taken into consideration. What is reasonable for a 5th grader in December at -15 in the snow to have to walk to receive her education while mom and dad work?

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

The walk zone for the middle school Westsprings/Cougar ridge has expanded to include the current bus zone for the elementary located on the same field. We live in the bus zone for the elementary which will be the new walk zone for the middle school. We are almost 2 km away from the school (9th Ave and 73rd Street) and are concerned about the walking distance. There is a city bus on 9th Ave that the grade 7-9 could take but I feel the younger children in grade 5-6 shouldn't have to walk this distance or take a city bus. It would be nice if we could offer school buses for those kids at elementary level in the current bus zones.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Please consider the distance students are expected to walk in the winter and the roads they are expected to cross i.e. 85th Street and Old Banff Coach road.

1

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

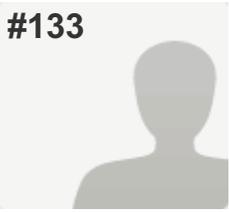

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

We in cougar ridge are caught in a catch 22. If we are honest about our feelings regarding the distance our kids will have to walk we may well be relegated to outside the walk zone where our kids spots in this school will certainly be put in jeopardy. If we don't ask for re assessment, 5th graders with one working parent will be required to walk 35+ minutes in all weather including a winter where deep snow and temperatures of -15 are common. My question is this: what would you do if your option were to say that walking any more than 15 minutes alone as a 10 year old twice a day is unacceptable or to accept that your child will be culled off again from the community that keeps getting the schools and has a higher likelihood of one stay at home parent or nanny to aid in transportation? No win situation. It's too far but the alternative is not acceptable either. We shouldn't have to choose.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Late October thru March weather and how feasible it is to have children walking alone to school because there is no bus - alternatively, a ten year old navigating city transit because the school is too far away is not acceptable either. Put a bus in for kids who walk more than 15 minutes and don't penalize us by culling us off in a lottery situation that will occur in short order because the school is already too small!

0

Grade of child(ren)

Q2: In which new school project(s) are you interested?

West Springs/Cougar Ridge Middle

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

While I am thrilled the Middle School is becoming a reality for our residents, I have grave concerns about the expected high volume of vehicular traffic in the community at pickup and drop off times. As it is, there is a substantial amount of vehicles at these times. Drivers are also failing to yield to pedestrians, speeding, and making dangerous illegal U-turns. This possesses significant risk to pedestrians and other commuters.

The walk zone should represent a "true" walk zone. If the catchment area is to include areas outside the "walk zone" measures need to be taken to reduce vehicular traffic. It is prudent that adequate and efficient bus transportation be provided to families so that they will actually use the bus instead of adding to the existing traffic congestion.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Why is not all of Cougar Ridge in the Walk zone. Once again Cougar Ridge is getting short changed!

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Safety is a Concern - a 4-way Stop (at minimum) needs to be added at Cougar Ridge Drive/89th Street and Old Banff Coach Road for students to cross this intersection safely. There have been numerous close calls at that intersection when people are crossing it.

Q2: In which new school project(s) are you interested? West Springs/Cougar Ridge Middle

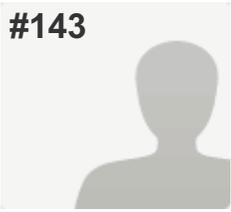

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

Will it include all of Cougar Ridge? I understand that there may be parts of our community that are excluded (ne side by Patterson).

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Please consider including our entire community. We already have to bus our children considerable distances for elementary school since West Springs does not have capacity for us. It doesn't make sense for parts of our community to be penalized for middle school as well.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

I don't understand why we are suddenly included in the walk zone...there is no way our kids could walk! We are currently in the bus zone for the elementary & the new middle school sits on the same site...why are we in the walk zone suddenly?

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

Distance from the school...if there is no way the kids could conceivably walk to school, there should be busing provided. How can the elementary & middle school that are on the same site have different walk zones? If you're in the bus zone for elementary I don't see how it can change.

Q3: After viewing the walk zone for your community, what questions do you still have regarding the designated zone?

None. The walk zone looks fine the way it has been proposed.

Q4: Is there anything else we need to consider regarding walk zones as we move forward?

- Traffic lights must be installed at the intersection of 89th St./Cougar Ridge Drive SW and Old Banff Coach Road
- from 89th St. SW between Wentworth Road and Wentworth Square, children will be walking near an open drainage basin and through a wooded area
- kids may cut through Co-op parking lot if taking city transit
- cross-walks must be designated along 89th Street to allow for pedestrian traffic from the western segment of Cougar Ridge
- speed control is required along Old Banff Coach road and speeds should be reduced to 50 kph (due to the overwhelming number of people who speed along OBCR)
