Dear Glendale & Glendale Meadows Community Association

Re: CBE construction and move into Glenmeadows School

The Calgary Board of Education (CBE) worked on finding a long-term solution for the accommodation of the Spanish Bilingual alternative program currently located at Westgate School. In 2014, the decision was made to relocate the program to Glenmeadows School when the Calgary Arts Academy moves to their new location. After further engagement with our parents, in December 2016, it was decided that students in the Spanish Bilingual program from kindergarten through Grade 6 will relocate for the beginning of the 2018-2019 school year.

While it is anticipated the Academy will vacate the school in early 2018, the additional time before students move will be used to do internal and external upgrades at the school site. Work will begin in early April 2017 for the installation of the new modular units. We anticipate the portable units will be installed at the school during the summer months.

In addition, as part of the Development Permit, the City of Calgary placed the following conditions that must be attended to before our students move into the school:

- Parking requirements and signage to support parking.
- Curb cuts, painted crosswalks, and associated signage.
- Addition of a fire hydrant.
- Drainage for new parking area.

This work will continue through the summer months.

The CBE has conducted an inspection of Glenmeadows School and plans to do internal and external work on the site prior to September 2018. Work will also be done for the placement of modulars including a link/hallway between school and existing modular unit.

We are committed to ensuring there is transparent communication with the community during all construction phases

Sincerely,

Calvin Davies
